The studies presented in this thesis were supported by a grant from AIDS Fonds (grant number 2009029), by internal grants from GGD Amsterdam, and by funding from RIVM. Sanofi Pasteur MSD and DDL Diagnostic Laboratory contributed to the conduct of two sub-studies on oral HPV. The Amsterdam Cohort Studies on HIV infection and AIDS, a collaboration between the Public Health Service of Amsterdam, the Academic Medical Center of the University of Amsterdam, Sanquin Blood Supply Foundation, and the University Medical Center Utrecht, are part of the Netherlands HIV Monitoring Foundation and financially supported by the Netherlands National Institute for Public Health and the Environment (RIVM).

Financial support for the publication of this thesis by Janssen-Cilag, Viiv Healthcare, Gilead, AbbVie, Sanofi Pasteur MSD, GSK, Chipsoft, DDL Diagnostic Laboratory, Condomerie, GGD Amsterdam, and Academic Medical Center/University of Amsterdam is gratefully acknowledged.

# Table of Content

**Chapter 1:** Introduction  

**Part 1: Epidemiology of anal and penile HPV infections**  

**Chapter 2:** HPV and anal cancer in HIV-infected individuals: a review  
23

**Chapter 3:** Anal and penile high-risk human papillomavirus prevalence in HIV-negative and HIV-infected MSM  
*AIDS 2013; 27:2921-31*  
49

**Chapter 4:** Association of HIV infection with anal and penile low-risk HPV infections among men who have sex with men in Amsterdam; the H2M study  
*Submitted*  
75

**Chapter 5:** The effect of HIV infection on anal and penile high-risk human papillomavirus incidence and clearance. A cohort study among men who have sex with men  
*Ready for submission*  
105

**Part 2: Epidemiology of oral HPV infections**  

**Chapter 6:** Oral human papillomavirus infection in HIV-negative and HIV-infected MSM  
*AIDS 2013; 27:2117-28*  
143

**Chapter 7:** Six-month incidence and persistence of oral HPV infection in HIV-negative and HIV-infected men who have sex with men  
*PLoS One 2014; 9:e98955*  
173

**Chapter 8:** Twelve-month incidence and clearance of oral HPV infection in HIV-negative and HIV-infected men who have sex with men: the H2M cohort study  
*BMC Infect Dis 2014; 14:3845*  
197
Part 3: Seroepidemiology

Chapter 9: Seroepidemiology of high-risk HPV in HIV-negative and HIV-infected MSM: the H2M study

Chapter 10: Anal, penile, and oral high-risk HPV infections and HPV seropositivity in HIV-positive and HIV-negative men who have sex with men

Chapter 11: HPV seroconversion following anal and penile HPV infection in HIV-negative and HIV-infected MSM
Cancer Epidemiol Biomarkers Prev 2014; 23:2455-61

Chapter 12: No evidence for a protective effect of naturally induced HPV antibodies on subsequent anogenital HPV infection in HIV-negative and HIV-infected MSM
J Infect 2014; 69:375-86

Part 4: Discussion

Chapter 13: Summarizing discussion

Chapter 14: Appendices:
