ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. D.C. van den Boom
ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Agnietenkapel
op donderdag 2 juli 2015, te 12:00 uur

door

Tim Pieter van de Hoef

geboren te Soest

</tbody>
</table>
Chapter 10  Basal stenosis resistance derived from simultaneous pressure and flow velocity measurements.  
Submitted.  

Part C  Prognostic implications of and therapeutic strategies directed towards the microcirculation  

Chapter 11  Impaired coronary autoregulation is associated with long-term fatal events in patients with stable coronary artery disease.  

Chapter 12  Impact of coronary microvascular function on long-term cardiac mortality in patients with acute ST-segment elevation myocardial infarction.  

Chapter 13  Intracoronary hemodynamic effects of pressure-controlled intermittent coronary sinus occlusion (PICSO): results from the first-in-man Prepare PICSO study.  

Chapter 14  Pressure-controlled intermittent coronary sinus occlusion (PICSO) in acute ST-segment elevation myocardial infarction: Results of the Prepare RAMSES study.  
EuroIntervention 2015 [Epub ahead of print].  

Part D  Discussion: Facing the complexity of ischaemic heart disease  

Chapter 15  Fundamentals in clinical coronary physiology: why coronary flow is more important than coronary pressure.  
Eur Heart J [Accepted for publication]  

Chapter 16  Summary of the thesis and future perspectives  
Samenvatting van het proefschrift  

Part E  Appendices  
List of publications  
Authors and affiliations  
Curriculum vitae  
Portfolio
