Glow With The Flow.
A thesis that contributes to the development of optical techniques to assess microcirculation functionality for the diagnosis, monitoring, therapy guidance and understanding of many diseases ranging from the onset of septic shock to the delivery of drugs to tumours. The first part of this thesis aims to develop a non-invasive technique to quantify microcirculatory blood flow velocity based on laser speckle flowmetry. The second part is devoted to the quantification of optical signals arising from photoluminescent upconversion nanoparticles for sensitive detection in biomedical tissues. The combination of these techniques is particularly useful in the context of tumour therapy by providing information on tumour angiogenesis, enabling molecular contrast and delivering nanoparticle-based drugs.

Academisch proefschrift

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. D.C. van den Boom
ten overstaan van een door het College voor Promoties ingestelde commissie, in het openbaar te verdedigen in de Agnietenkapel
op woensdag 1 april 2015, te 14:00 uur

door

Annemarie Nadort

geboren te Zaanstad
PROMOTIECOMMISSIE

Promotores:   prof. dr. A.G.J.M. van Leeuwen
               prof. dr. M.C.G. Aalders
               Universiteit van Amsterdam

Co-promotor:  dr. ir. D.J. Faber
               Universiteit van Amsterdam

Overige leden: prof. dr. E.T. van Bavel
                prof. dr. W.J. Buma
                prof. dr. H.J.C.M. Sterenborg
                prof. dr. ir. W. Steenbergen
                dr. E.G. Mik

                Erasmus MC

Faculteit der Geneeskunde
TABLE OF CONTENTS

Chapter 1  Introduction  7

Chapter 2  Laser speckle contrast imaging  25

Chapter 3  Quantitative laser speckle flowmetry of the in vivo microcirculation using sidestream dark field microscopy  37

Chapter 4  Quantitative blood flow velocity imaging using laser speckle flowmetry  57

Chapter 5  Upconversion nanoparticles  91

Chapter 6  Quantitative imaging of single upconversion nanoparticles in biological tissue  103

Chapter 7  Feasibility study of the optical imaging of a breast cancer lesion labeled with upconversion nanoparticle biocomplexes  133

Chapter 8  Discussion and conclusion  155

Chapter 9  Outlook  173

Appendices  List of abbreviations  181
List of symbols  182
Samenvatting van het proefschrift  185
Thesis summary  191
List of publications  197
Portfolio  200
Curriculum vitae  203
Acknowledgments  205
