Diversity and complexity of cardiac sodium channel (dys)function
Rivaud, M.

Citation for published version (APA):
Rivaud, M. (2018). Diversity and complexity of cardiac sodium channel (dys)function: Relevance for arrhythmias in inherited and acquired diseases
Diversity and complexity of cardiac sodium channel (dys)function

Relevance for arrhythmias in inherited and acquired diseases

Thursday 31 May 2018, 14:00
Agnietenkapel
Oudezijds Voorburgwal 231
1012 EZ Amsterdam
There will be a reception afterwards
Celebration 20:30 - 00.00
Green Duck
Amsterdamsestraatweg 1
1391 AA Abcoude

Invitation
To attend the public defense of the thesis entitled
Diversity and complexity of cardiac sodium channel (dys)function
Relevance for arrhythmias in inherited and acquired diseases
by
Mathilde Rivaud

Diversity and complexity of cardiac sodium channel (dys)function - relevance for arrhythmias in inherited and acquired diseases -

Mathilde Rivaud
Diversity and complexity of cardiac sodium channel (dys)function
-relevance for arrhythmias in inherited and acquired diseases-

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. ir. K.I.J. Maex
ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Agnietenkapel
op donderdag 31 mei 2018, te 14:00 uur

door Mathilde Rivaud

egenoren te Nantes, France
Promotiecommissie:

Promotor: prof. dr. C.R. Bezzina, AMC-UvA
Copromotores:
- dr. C.A. Remme, AMC-UvA
- dr. E.E.J.M Creemers, AMC-UvA

Overige leden:
- prof. dr. M. Delmar, NYU School of Medicine
- prof. dr. J. van der Velden, Vrije Universiteit Amsterdam
- prof. dr. M.P. van den Berg, Rijksuniversiteit Groningen
- prof. dr. ir. J.M.T de Bakker, AMC-UvA
- prof. dr. V.M. Christoffels, AMC-UvA
- dr. M.W. Veldkamp, AMC-UvA
- dr. ir. C.J. Zuurbier, AMC-UvA

Faculteit der Geneeskunde

The research described in this thesis was supported by a grant of the Dutch Heart Foundation (DHF NHS2010/B201)

Funded by Hartstichting

Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged
