Central and peripheral consequences of obesity

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. D.C. van den Boom
ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Agnietenkapel
op donderdag 18 februari 2016, te 14.00 uur

door

Barbara Anna Maria de Weijer
geboren te Hilversum
Promotiecommissie

Promotores  Prof. dr. E. Fliers  Universiteit van Amsterdam
Co-promotores  Dr. M.J.M. Serlie  Universiteit van Amsterdam
                     Dr. M.C. van Eijk  Universiteit van Amsterdam
Overige leden  Prof. dr. E. Lutgens  Universiteit van Amsterdam
                     Prof. dr. T. van der Poll  Universiteit van Amsterdam
                     Prof. dr. H. Pijl  Universiteit Leiden
                     Dr. L.M. de Brauw  Slotervaart Ziekenhuis
                     Prof. dr. C.J.J. Tack  Radboud Universiteit Nijmegen
                     Prof. dr. U.H.W. Beuers  Universiteit van Amsterdam

Faculteit der Geneeskunde
Experience is the hardest kind of teacher, it gives you the test first and the lessons afterward.

Oscar Wilde

# TABLE OF CONTENTS

Chapter 1  General introduction 9

## PART I: Obesity and the brain

Chapter 2  Lower striatal dopamine D<sub>2/3</sub> receptor availability in obese compared to non-obese subjects. 33

Chapter 3  Striatal dopamine receptor binding in obese women before and after gastric bypass surgery. 41

Chapter 4  Striatal dopamine D<sub>2/3</sub> receptor availability increases after long-term bariatric surgery-induced weight loss 53

## PART II: Obesity, metabolism and inflammation

Chapter 5  Hepatic and peripheral insulin sensitivity do not improve 2 weeks after bariatric surgery. 71

Chapter 6  Influx of macrophages and T cells in visceral and subcutaneous adipose tissue of morbidly obese women is not associated with insulin sensitivity. 83

Chapter 7  Serum Retinol Binding Protein-4 Is Inversely Associated with Insulin Action in Adipose Tissue, Skeletal Muscle and Liver in Obese Women. 101

Chapter 8  Morbid obesity is associated with hepatic inflammation independent of liver fat content and insulin sensitivity. 115

Chapter 9  Summary and General discussion 147

Chapter 10  Appendix
