

Supplemental Table 3. Pairwise F_{ST} (below diagonal) and Φ_{ST} (above diagonal) values between sample sites in the Atlantic Ocean for *Haloptilus longicornis* sp 1, based on mtCOII data. Samples are grouped by ocean gyres, with sample site numbers as in Tables 1 & 2. Material from both AMT20 (2010) and AMT22 (2012) are included. Significant values ($P < 0.05$) are shaded grey, **bold** indicates significance following correction for multiple comparisons (FDR).
