Beyond the short term effects of caesarean delivery and gynaecological surgery
Kok, N.

Citation for published version (APA):
Kok, N. (2015). Beyond the short term effects of caesarean delivery and gynaecological surgery
Chapter 10

Referentielijst met een overzicht van co-auteurs en hun aandeel in het manuscript
Sonographic measurement of lower uterine segment thickness to predict uterine rupture during a trial of labor in women with previous Cesarean section: a meta-analysis

*Ultrasound Obstet Gynecol* 2013; 42: 132–139

N. Kok: study concept and design, acquisition of data, data analysis, interpretation of data, drafting the manuscript, final approval of the manuscript

I.C. Wiersma: acquisition of data, drafting the manuscript, final approval of the manuscript

B.C. Opmeer: data analysis, critically reviewing the manuscript, final approval of the manuscript

I.M. De Graaf: critically reviewing the manuscript, final approval of the manuscript.

B.W. Mol: acquisition of data, critically reviewing the manuscript, final approval of the manuscript.

E. Pajkrt: study concept and design, supervision of data acquisition and analysis, acquisition of data, interpretation of data, critically reviewing the manuscript, final approval of the manuscript.

Risk of maternal and neonatal complications in subsequent pregnancy after planned caesarean section in a first birth, compared with emergency caesarean section: a nationwide comparative cohort study

*BJOG* 2014;121:216–223

N. Kok: study concept and design, acquisition of data, data analysis, interpretation of data, drafting the manuscript, final approval of the manuscript

L. Ruiter: interpretation of data, drafting the manuscript, critically reviewing the manuscript, final approval of the manuscript

M. Hof: acquisition of data, final approval of the manuscript, final approval of the manuscript.

A. Ravelli: acquisition of data, final approval of the manuscript, final approval of the manuscript.

B.W. Mol: supervision of data acquisition and analysis, interpretation of data, critically reviewing the manuscript, final approval of the manuscript.

E. Pajkrt: supervision of data acquisition and analysis, interpretation of data, critically reviewing the manuscript, final approval of the manuscript.

B. Kazemier: study concept and design, acquisition of data, data analysis, interpretation of data, critically reviewing the manuscript, final approval of the manuscript
Trial of labor after cesarean: attempted operative vaginal delivery versus emergency repeat cesarean, a prospective national cohort study

A.L. Rietveld: study concept and design, acquisition of data, data analysis, interpretation of data, drafting the manuscript, final approval of the manuscript

N. Kok: data analysis, interpretation of data, drafting the manuscript, critically reviewing the manuscript, final approval of the manuscript

B.M. Kazemier: acquisition of data, data analysis, critically reviewing the manuscript, final approval of the manuscript

C.J.M. de Groot: study concept and design, critically reviewing the manuscript, final approval of the manuscript

P.W. Teunissen: study concept and design, supervision of data acquisition and analysis, interpretation of data, critically reviewing the manuscript, final approval of the manuscript

Elective repeat caesarean delivery compared with trial of labour after a prior caesarean delivery: a propensity score analysis
Accepted in European Journal of Obstetrics and Gynaecology

N. Kok: study concept and design, acquisition of data, data analysis, interpretation of data, drafting the manuscript, final approval of the manuscript

L. Ruiter: interpretation of data, drafting the manuscript, critically reviewing the manuscript, final approval of the manuscript

R. Lindeboom: data analysis, interpretation of data, critically reviewing the manuscript, final approval of the manuscript

C.J. de Groot: critically reviewing the manuscript, final approval of the manuscript

E. Pajkrt: supervision of data acquisition and analysis, interpretation of data, critically reviewing the manuscript, final approval of the manuscript

B.W. Mol: supervision of data acquisition and analysis, interpretation of data, critically reviewing the manuscript, final approval of the manuscript

B.M. Kazemier: study concept and design, acquisition of data, data analysis, interpretation of data, critically reviewing the manuscript, final approval of the manuscript
Balancing risks and benefits: Preventing first birth Caesarean due to non-progressive labour

N.Kok: study concept and design, acquisition of data, data analysis, interpretation of data, drafting the manuscript, final approval of the manuscript

B.W. Mol: study concept, supervision of data acquisition and analysis, critically reviewing the manuscript, final approval of the manuscript

C. de Groot: critically reviewing the manuscript, final approval of the manuscript

E. Pajkrt: study concept, supervision of data acquisition and analysis, critically reviewing the manuscript, final approval of the manuscript

B.M. Kazemier: study concept and design, acquisition of data, data analysis, interpretation of data, critically reviewing the manuscript, final approval of the manuscript

Different surgical techniques to reduce post-operative adhesion formation: a systematic review and meta-analysis

R.P.G. ten Broek: study concept and design, acquisition of data, data analysis, interpretation of data, drafting the manuscript, final approval of the manuscript.

N. Kok: acquisition of data, data analysis, interpretation of data, critically reviewing the manuscript, final approval of the manuscript.

E.A. Bakkum: interpretation of data, critically reviewing the manuscript, final approval of the manuscript.

R.P. Bleichrodt: interpretation of data, critically reviewing the manuscript, final approval of the manuscript.

H. van Goor: study concept and design, supervision of data acquisition and analysis, interpretation of data, critically reviewing the manuscript, final approval of the manuscript.
