ISBN: 978-94-6299-201-6

Printing: Ridderprint BV, the Netherlands

Lay-out: Lisette Potze

About the cover: The author got inspired by the painting La Gerbe (1953) by H. Matisse. On the front cover a caricature of the painting where instead of leaves the inner membrane of the mitochondria are schematic represented. The different colors used, represent the different mechanisms of Betulinic acid and the chapters in this thesis. Cover design by Lisette Potze and René Scriwanek.

The research described in this thesis was performed at the Center for Experimental and Molecular Medicine (CEMM), Laboratory of Experimental Oncology and Radiobiology (LEXOR) at the Academic Medical Center (AMC), University of Amsterdam (UVA), The Netherlands.

The research described in this thesis was supported by a grant of Stichting Nationaal Fonds tegen Kanker. This support is gratefully acknowledged.

Printing of this thesis was financially supported by:

The Academic Medical Center Amsterdam, ABN Amro Bank, Rob & Gerda Potze.

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. D.C. van den Boom
ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Agnietenkapel
op dinsdag 24 november 2015, te 10.00 uur

door

Lisette Potze

geboren te Alkmaar
Promotiecommissie

Promotor:

Prof. dr. J.P. Medema  Universiteit van Amsterdam

Copromotores:

dr. J.H. Kessler  Universiteit van Amsterdam
dr. F.M. Vaz  Universiteit van Amsterdam

Overige leden:

Prof. dr. C.J.F. van Noorden  Universiteit van Amsterdam
Prof. dr. E.F. Eldering  Universiteit van Amsterdam
Prof. dr. R.J.A. Wanders  Universiteit van Amsterdam
Prof. dr. A.J. Verhoeven  Universiteit van Amsterdam
Prof. dr. S. de Jong  Rijksuniversiteit Groningen
dr. S.W.G. Tait  University of Glasgow

Faculteit der Geneeskunde
“An expert is someone who has made all the mistakes which can be made, in a very narrow field.”

Niels Bohr

# Table of contents

**Chapter 1**

General introduction 9

**Chapter 2**

Betulinic acid-induced mitochondria-dependent cell death is counter balanced by an autophagic salvage response 55

**Chapter 3**

Betulinic acid induces a novel cell death pathway that depends on cardiolipin modification 77

**Chapter 4**

Betulinic acid induces a rapid form of cell death in colon cancer stem cells 107

**Chapter 5**

Improved identification of lipids using physico-chemical properties: application to lipidomics analysis of Betulinic acid treatment 127

**Chapter 6**

General discussion 147

**Annexes**
