Programming of hippocampal structure and function by early-life stress

Opportunities for nutritional intervention

Eva F.G. van Meeteren-Naninck

The studies described in this thesis were performed at the department of Structural and Functional Plasticity of the Nervous System of the University of Amsterdam, the Netherlands. Printing of this thesis was kindly supported by Swammerdam Insititute for Life Sciences, Amsterdam, the Netherlands.

ISBN 978-9-46-233111-2

Cover Design: Marc Lochs

Lay out: Casper Harinck & Eva van Meeteren-Naninck

Programming of hippocampal structure and function by early-life stress

Opportunities for nutritional intervention

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. D.C. van den Boom
ten overstaan van een door het College voor Promoties ingestelde
commissie, in het openbaar te verdedigen in de Agnietenkapel
op dinsdag 1 december 2015, te 14.00 uur

door

Eva Francisca Geertruda Naninck
geboren te Eindhoven

Promotiecommissie:

Promotor: Prof. dr. P.J. Lucassen Universiteit van Amsterdam

Copromotor: Dr. A. Korosi Universiteit van Amsterdam

Overige leden: Prof. dr. E.M. Hol Universiteit van Amsterdam
Prof. dr. M. Joëls UMC Utrecht
Prof. dr. T.J. Roseboom Universiteit van Amsterdam
Dr. M.V. Schmidt Max Planck Institute
Dr. P.J. Verschure Universiteit van Amsterdam

Faculteit: Faculteit der Natuurwetenschappen, Wiskunde en Informatica

Amor et perseverantia succedunt omnia

CONTENTS

PREFACE	9
Early-life stress shapes the brain for life	
CHAPTER 1	21
Perinatal programming of adult hippocampal structure and function; emerging roles of stress, nutrition and epigenetics	
CHAPTER 2	47
Chronic early-life stress alters developmental and adult neurogenesis and impairs cognitive function in mice	
CHAPTER 3	89
Accurate measurement of the essential micronutrients methionine, homocysteine, vitamins B ₆ , B ₁₂ , B ₉ and their metabolites in plasma, brain and maternal milk of mice using LC/MS ion trap analysis	
CHAPTER 4	107
Supplementation of the maternal diet with essential micronutrients protects against early-life stress-induced cognitive impairments in offspring	
CHAPTER 5	145
Effects of chronic early-life stress on neurogenesis in female mice and its response to early nutrition and adult exercise. A preliminary report	
CHAPTER 6	167
Sex differences in adolescent depression: Do sex hormones determine vulnerability?	
CHAPTER 7	191
General Discussion. Food for thought	
CHAPTER 8	225
English summary/Nederlandse samenvatting	
APPENDICES	237
