When I was an undergraduate student, I had never thought about doing a PhD. Life is always new and unexpected for me. Certainly, it is a great challenge to pursue a PhD. But luckily, there are so many people supporting and helping me. I would like to thank all the people who have helped me complete this challenge.

Firstly, I would like to thank my supervisor and promoter, Prof. dr. Theo Gevers. He always encourages and leads me to the right direction. His guidance and help is not only in my research, but also in my personal life. Besides scientific advices, I really appreciate the freedom he gives me to also explore my own ideas. Without his help, this thesis would never exist. I would also like to thank Prof. dr. Arnold Smeulders for being my co-promotor and helping me in the final steps of my thesis. His inspiring advice and great patience is highly appreciated.

I would like to present my gratitude to all the colleagues in my group, whom I spent every working day with. In these four years, we had a lot of fun together. It is not only because of the great squash day, volleyball seasons, table tennis march, many times of BBQ and other events. Moreover, we are like a big family, everyone is so nice and willing to help each other. It is my pleasure to work in this group.

Specially, I would like to thank Ninghang Hu, whom I work closely with in the past years. We spent a lot of time on learning new courses, reading papers and discussing new ideas together. Ninghang is not only a good colleague but also a great friend.

I would like to thank Fangyong Tang and Hairong Li for helping me settle down when I came to Amsterdam four years ago. Further, many thanks to all my Chinese friends, Zhaochun Ren, Shangsong Liang, Fei Cai, Guangliang Li, Hao Zhu, Ling Zhong, Wei Quan, Lingxue Cao, Hui Xiong, Xiaotang Di, Zhou Tang, Fangyong Tang, Hairong Li, Xiang Wang, Que Chen, Yanfang Feng, Jian Fu, Chao Li, Si Yin, Jing Zhou, Zhuozen Liu, Dan Li, Zhen Wei, Zepeng Sun, Huisi Yang, Xinyi Li, Anbang Sun, Jason, Zhe Ma, Junhui Wang, Jun Xiao and so on.
