The studies presented in this thesis were conducted at the Department of Public Health, Academic Medical Center, University of Amsterdam, the Netherlands. The research was mainly from the HELIUS study and partly from the ABCD study. The HELIUS study was funded by Academic Medical Center, Amsterdam, the Public Health Service of Amsterdam, the Dutch Heart Foundation (grant number: 2010T084), the Netherlands Organization for Health Research and Development (ZonMw) (grant number: 200500003), and the European Fund for the Integration of non-EU immigrants (EIF) (grant number: 2013EIF013). The ABCD study was funded by the Netherlands Organization for Health Research and Development (ZonMw) (TOP grant: 40-00812-98-11010).
