Financial justification of the research
Financial justification of the research

This research was supported by the Dutch Technology Foundation STW, which is part of the Netherlands Organisation for Scientific Research (NWO) and partly funded by the Ministry of Economic Affairs (project number 10948). The users committee of this STW project and STW representative dr. H. van der Valk are kindly acknowledged for their input during the committee meetings: Colgate-Palmolive, represented by dr. C. Timmer; GlaxoSmithKline Consumer Healthcare, represented by dr. R.J. Lynch; Ivoren Kruis (the Dutch national association for preventive oral healthcare), represented by R. Bos; De Friesland Zorgverzekeraar, represented by P. Roozen-Everts and Inspektor Research Systems B.V., represented by E. Waller and dr. ir. E. de Josselin de Jong. Inspektor Research Systems B.V. supported the research in kind by providing a QLF-D camera and software development.

The studies described in chapters 4 and 6 were also supported by the Top Institute Food and Nutrition (TIFN). Purchase of the BioFlux Z1000 setup, used in chapter 4, was (partially) funded by NWO Earth and Life Sciences (ALW), project 834.13.006. The research described in chapter 5 was also supported by NGen Oral Pharma N.V., Willemstad, Curacao. The research as described in chapter 7 was also supported by Menzis Health Insurer, the Netherlands.

The organizations supporting the research had no role in study design, data collection and analysis, decision to publish, or preparation of the manuscript.
Author contributions
Author contributions

of the published or submitted manuscripts in this thesis.

Chapter 2 - Effect of metalloporphyrins on red autofluorescence from oral bacteria
C.M.C. Volgenant, M.H. van der Veen, J.J. de Soet, J.M. ten Cate
Published in the European Journal of Oral Sciences (2013)

Author contributions
Conceived and designed the study: CMCV, MHvdV, JJdS, JMtC
Performed the study: CMCV, MHvdV
Analysed the data: CMCV, MHvdV
Drafted the manuscript: CMCV, MHvdV, JMtC
Critically revised the manuscript: JJdS

Chapter 3 - Red fluorescent biofilm: the thick, the old and the cariogenic
C.M.C. Volgenant, M.A. Hoogenkamp, M.J. Buijs, E. Zaura, J.M. ten Cate,
M.H. van der Veen
Published in the Journal of Oral Microbiology (2016)

Author contributions
Conceived and designed the study: CMCV, MAH, JMtC, MHvdV
Performed the study: CMCV, MAH, MHvdV, MJB
Analysed the data: CMCV, EZ, MHvdV
Drafted the manuscript: CMCV, MAH, EZ, MHvdV
Critically revised the manuscript: MJB, JMtC

Chapter 4 - Red and green fluorescence from oral biofilms
C.M.C. Volgenant, M.A. Hoogenkamp, B.P. Krom, M.M. Janus, J. M. ten Cate,
J.J. de Soet, W. Crielaard, M. H. van der Veen
Submitted

Author contributions
Conceived and designed the study: CMCV, MAH, BPK, MHvdV, JJdS
Performed the study: CMCV, MAH, MMJ
Analysed the data: CMCV, MAH, MHvdV, JJdS
Drafted the manuscript: CMCV, MAH, MHvdV, JJdS
Critically revised the manuscript: MMJ, JMtC, BPK, WC

The used saliva samples in this study were obtained as part of a clinical trial (chapter 6). The authors thank N.A.M. Rosema for coordinating the clinical study. For assistance in capturing fluorescence photographs, the authors thank Y. Altindağ. For the clinical examinations the authors thank S. Bizzarro (assessment of the bleeding on marginal probing).
Author contributions

Chapter 5 - Comparison of red autofluorescing plaque and disclosed plaque
   – a cross-sectional study
C.M.C. Volgenant, M. Fernandez y Mostajo, N.A.M. Rosema, G.A. Van der Weijden,
J.M. ten Cate, M.H. van der Veen
Published in Clinical Oral Investigations (2016)

Author contributions
   Conceived and designed the study: CMCV, MFyM, NAMR, GAvdW, JMtC, MHvdV
   Performed the study: CMCV, MFyM, NAMR, MHvdV
   Analysed the data: CMCV, MHvdV
   Drafted the manuscript: CMCV, GAvdW, MHvdV
   Critically revised the manuscript: MFyM, NAMR, JMtC

The authors thank N. Hennequin-Hoenderdos and D.E. Slot for coordinating the clinical
study. For the clinical examinations, the authors thank G. van Anraat (clinical plaque
assessment), E.J.C. Martin (assessment of the bleeding on marginal probing), E. van der
Sluijs and S. Supranoto (professional prophylaxis).

Chapter 6 - Dynamics of red fluorescent dental plaque during experimental gingivitis
   – a cohort study
M.H. van der Veen*, C.M.C. Volgenant*, B.J.F Keijser, J.M. ten Cate, W. Crielaard
* These authors contributed equally to this manuscript
Published in the Journal of Dentistry (2016)

Author contributions
   Conceived and designed the study: MHvdV, BJFK, WC
   Performed the study: MHvdV, CMCV
   Analysed the data: MHvdV, CMCV
   Drafted the manuscript: MHvdV, CMCV
   Critically revised the manuscript: BJFK, JMtC, WC

The authors thank N.A.M. Rosema for coordinating the clinical study. For assistance
in capturing fluorescence photographs, the authors thank Y. Altindağ. For the clinical
examinations the authors thank J.M. Voll (clinical plaque assessment with Silness & Löe),
and S. Bizzarro (assessment of the bleeding on marginal probing).
Chapter 7 - Salivary microbiome composition and red fluorescent dental plaque of children and their parents
C.M.C. Volgenant, B.W. Brandt, M.J. Buijs, D. Duijster, C. van Loveren, J.M. ten Cate, M.H. van der Veen, E. Zaura
Submitted
Author contributions
Conceived and designed the study: CMCV, DD, CvL, MHvdV, EZ
Performed the study: CMCV, MJB, DD, MHvdV
Analysed the data: CMCV, BWB, EZ
Drafted the manuscript: CMCV, BWB, MHvdV, EZ
Critically revised the manuscript: MJB, DD, CvL, JMtC
The authors would like to acknowledge the support from the Jeugdtandzorg Den Haag, especially Hans Berendsen, Helga Wissenburg and Sylvia Gossen. The authors thank Elly C. van Deutekom - Mulder and Joyce van der Horst for the technical support.

Chapter 8 - Red fluorescence of dental plaque in children – a cross-sectional study
C.M.C. Volgenant, E. Zaura, B.W. Brandt, M.J. Buijs, M. Tellez, G. Malik, A.I. Ismail, J.M. ten Cate, M.H. van der Veen
Submitted
Author contributions
Conceived and designed the study: CMCV, EZ, MT, AII, JMtC, MHvdV
Performed the study: CMCV, MJB, GM
Analysed the data: CMCV, EZ, BWB, MHvdV
Drafted the manuscript: CMCV, EZ, BWB, MHvdV
Critically revised the manuscript: MJB, MT, GM, AII, JMtC
The authors thank the staff of the pediatric dental clinic at the Kornberg School of Dentistry for their support during the clinical phase of this study and Deborah Krystal Russell, Vani Nanda, Dustin R. Root, Dana Al-Baroudi, Tina M. Statkevicz and Bin Wang for their assistance with the clinical procedures. We thank Prof. dr. R. Stevens and Hongming Zhang from the Kornberg School of Dentistry and Michel A. Hoogenkamp from ACTA for help with storage and transportation of the microbiological samples. The authors also thank Elly C. van Deutekom - Mulder from ACTA for processing the microbiological samples and Ilona F. Persoon from ACTA for assessment of the bitewings.

Janus MM, Crielaard W, Volgenant CMC, Van der Veen MH, Brandt BW, Krom BP: Candida albicans has a community-wide effect on initial in vitro oral biofilms.

Other publications

List of publications

(Co-)author of abstracts at scientific conferences
ORCA 2011, Kaunas, Lithuania
Red fluorescence of dental plaque from dental students.

IADR 2012, Iguazu, Brazil
Medium additives determine the autofluorescence of \textit{in vitro} biofilm;
Visual comparison of red fluorescing plaque and disclosed plaque on photos.

ORCA 2012, Cabo Frio, Brazil
Biofilm age and thickness determines the amount of red fluorescence;
Visual detection of caries lesions on oral white light and fluorescence photographs.

ORCA 2013, Liverpool, United Kingdom
Caries assessment of occlusal surfaces on QLF- and white light photographs.

KNVM-NVMM conference, Papendal, the Netherlands
Methicillin resistant \textit{Staphylococcus aureus} in dental students.

ORCA 2015, Brussels, Belgium

OMIG 2016, Gregynog Hall, Wales, United Kingdom
Red fluorescence from \textit{in vivo} and \textit{in vitro} oral biofilm – \textit{the effect of different donors}.

ORCA 2016, Athens, Greece
Dental caries status of institutionalized young adults with mild mental disability and multi-problems – \textit{first results};
The motivational effect of fluorescence photographs additional to oral hygiene lessons at primary schools.
Red fluorescent dental plaque
An indicator of oral disease?

C.M.C. Volgenant

Invitation
to attend the public defense
of the PhD thesis

Red fluorescent
dental plaque
An indicator of oral disease?

by Catherine Volgenant

on Friday, September 30, 2016
at 13:00 hrs,
Aula of the
University of Amsterdam,
Oude Lutherse Kerk,
Singel 411, Amsterdam.

You are cordially invited to the
reception after the defense at
Café Luxembourg
(across the street)
