Acknowledgements

After four years and a bit, I’ve finished my PhD! It wasn’t always only nice, but I have to say that the whole experience was amazing. Besides learning about chemistry and research, I’ve also learned a lot about myself, other people and general life lessons. This section is dedicated to everyone who supported me in the past years. Thank you to all the people who taught me, advised me, helped me, celebrated with me in successful times, were there for me in less successful times, who were interested in my research, critical on my work, or encouraging me, and also to those who just had fun with me.

First of all, I want to thank my promotors. Jarl Ivar, you offered me the position to start as the first PhD on your ERC project and I have never regretted my decision to accept the offer. You have always been involved in the research and gave me the encouragement that I needed. From the moment we started working together, I’ve felt at ease with you and I’ve never hesitated to ask you for help. Your door is always open and our discussions about chemistry never failed to give me new insights and ideas. I’ve also enjoyed all our conversations that were not chemistry related and I can appreciate that you still always ask me ‘how are you?’, even though you know that when you ask it that way, my answer is always ‘good’. I even start to miss your mean little jokes. I also have to thank you for putting up with my let’s-finish-it-last-minute-mentality, because you were always willing to correct my abstract/poster/presentation, even if it was only a few hours before the deadline. Thanks for everything! Joost, I am thankful that you tried to help me in your own way and that you were critical on my research. I wasn’t always keen to hear it, but I have to admit that you were right in most cases. I apologize for ruining our most personal conversation at labouting by yelling ‘Gotcha!’ in the end, because I actually enjoyed it. Sometimes when I see a nice photograph, I remember that moment.

I’m also grateful to the rest of my committee. Bas, thank you for investing so much time in my research. Your DFT calculations are a great addition to the experimental work. You were always interested in my work and found the time to help me with my problems and puzzles, in particular with EPR results. It was very helpful that you usually showed me a different approach to the problem. I will always remember you sincerity and kindness. Kees, my career to become an independent researcher started in the labs of Molinc and I want to thank you again for your guidance of my MSc project. During that research, I started to develop my fascination for bifunctional catalysts. You arranged the internship in Heidelberg for me and stayed interested in my research and
personal development. Thank you for the encouraging talks in the hallway. Tati, as you are the C-H activation expert within UvA, it was obvious that we asked you to take part in this committee and I’m happy that you accepted the invitation. Sander, I remember you as the professor that asked the most questions during HIMS meetings. To me it seems that you have an interest in and knowledge about many fields in chemistry and I’m thankful for having you in my committee. Marc-Etienne, after meeting at the conference in Bratislava, I’ve got to know you as a very kind person with an eye for detail. I’m looking forward to your questions during my defence. Louise Berben, thank you for taking the time to be part of my committee and I regret it that, due to teaching-responsibilities, you can’t make it to my defence. Axel Klein, fortunately you were willing to take the free seat. I enjoyed our collaboration (for which I also have to thank Nicolas Vogt and Aaron Sandleben) on the nickel complexes and appreciated your input on some of the mysteries around these complexes.

Jan, Henk, and Martin, you are not part of my committee, but I want to thank you for all the organic chemistry that you’ve taught me and for all the nice conversation in the hallways. Jordi Carbo and Diego, thank you for our fruitful collaboration! Franti, thank you for sharing your expertise on electrochemistry. Prof. Hashmi, thank you for allowing me as a Msc-internship student in you lab just before I started my PhD, which was a very valuable experience. I enjoyed our occasional meetups at international conferences. With the help of (synthesis-machines) Pascal en Marcel I’ve learned a lot about gold-chemistry.

I want to thank all the technicians who helped me out in the past years. Erik, Fatna, and Lidy, thanks for arranging everything around the labs. Taasje, thank you in particular for your help with the OTTLE cell, the in-situ-IR-autoclave and the stopped flow. Jan Meine, thank you for helping me with all my silly NMR questions, difficult experiments and for fixing machine every time I had a problem. Ed, I won’t forget the thoughtful look on your face whenever I asked you if I maybe..., maybe..., maybe quickly could hand in another mass-sample before it decomposed. Thank you for all your help. Michiel Hilbers (photonics), thank you for spending a day measuring transient UV/Vis absorption. And the golden oldies: Jan Geenevasen, Han Peeters and Hans Bieraugel, thank you for all the nice (and wise) conversations.

I want to start the more informal part by thanking my paronymhs. Sandra, I can sincerely say that you were there for me, for better and for worse. Looking back, it is funny that we were trying to give each other advice, while we were usually stuck in the same situation. Nevertheless, it helped me tremendously that I could talk to you about anything. I cannot tell you how empty it felt after you were gone! That sounds really dramatic but who else was so crazy to guess all 197 countries of the world together with me. Sannie, thank you for your friendship and all the memorable moments together! Niels, I’ve enjoyed every moment of our friendship since we got to know each other at the BEC to Berlin. You are one of the kindest persons I know and I’m really happy that I have you in my life. Even when you have your own problems, you’re always helpful to other people and such a cheerful and enthusiastic person. Thank you for always listening to my (sometimes depressing) stories about my (PhD-)life and your supportive talks. And of course for taking care of my house and plants when I was on holidays. I hope you will get your own PhD-dream.
Time to thank all my colleagues and friends from Homkat: My fellow J.I. Joes, Vincent and Danny. Vinnie, the guy-with-a-thousand-nicknames, it took a while for you to let me in, but now we’re even going on holidays together! It is always nice to talk to you and it was nice to learn that there is a wilder guy beneath the quiet surface. Danny, the dream man of our team, thank you for your memorable parties in Diemen. It’s nice to talk to you and sometimes disagree with you. Esther S., I (most of the time) loved our drunk, deep and meaningful conversations! I think we can conclude that we are, besides colleagues, also friends :) I also like to discuss research and chemistry with you. Monalisa, you have the gift to convince me to get out of my comfort zone; talking about weird stuff and doing unexpected things. You’re the kind of person that makes life more interesting! Andrea, during your time in Amsterdam, I spent a lot of my time hanging out with you. You were always in for drinks at the Oerknal and conversations about life, love and friendship. Drunk (also sober) Andrea is a lot of fun! I’ve missed that from the moment you moved to the UK. And, one day, I will finish that painting for you. Martin, I never regretted convincing you to take one more last beer because you’re really good and funny company when being tipsy. I forgive you for the sink. Fenna, I admire you for sharing your emotions and feelings so easily. Thanks for being the positive-spirit-guru of our office. Stefan, it was really nice to start the PhD trajectory around the same time as you. I appreciated our conversations about doing a PhD because of your down-to-earth mentality. I’ve enjoyed our diners and your passion for Scooter. Vivek, whenever I was feeling down, our talks about cooking always cheered me up! Riccardo, you are a very helpful person, thanks for that (even though I had to bring cake sometimes, before you wanted to discuss electrochemistry with me). Also thanks for all the nice Italian cooking. Bart and Pauline, the two of you were inseparable. I have good memories of sharing the office with you. Thanks for all the nice moments (especially the ‘Russian’ simulation). Julia, your time in Homkat was short but intense! I liked practising your Dutch with the newspaper horoscope and the trip to Rostock was awesome. SanderO, I had such a good time with you during all the borrels! But also talking about chemistry was really nice because our projects had some similarities. Too bad I never beat you with making bubbles... René, thank you for all the good times. And of course your help with CV. The Postdoc Posse: Marc, Sergio and Simon, thanks for the nice company at lunch time. Marc, your passion for chemistry in contagious. I hope you get the Marie Curie grant! Sergio, I remember the first birthday party you attended in Amsterdam and that must have been a crazy night for you. Simon, thanks for taking over Sandra’s sporcle duty. I’m amazed by your endless knowledge about films and series. Wojciech, even though you never came to visit our office for me, I’ve enjoyed your presence there. David, we should go sometime for that run we’d agreed on. Christophe, thank you for all your help with EPR measurements. Paul, Anne, Colet, Andrei, Sandra N, Lukas, thanks for the good times in and around the lab. Bid, Shaotao, Bin, Xiaowu, Bradja, thanks for the occasional talks. The younger generation: Raoul, Arnout, Joeri, Valentinos, Pim, Kaj, I’m sorry that you had to witness my period when I thought I was too old to socialize with students. I hope I made it (a bit) up to you after you all started as PhDs. People from InCatT: Sander K, Zohar, Remko, it was always nice to talk to you guys! Juju, at one point in our lives, we will definitely go on that surftrip. Former postdocs: Matthias.
I liked being your fumehood-neighbor a lot. I’ve always highly appreciated your advices about life and alternative careers. Opening a schnitzel restaurant or scubadiving school in australia really doesn’t sound that bad. Saeed, the following fumehood-neighbor. The topics of our conversation were usually more ‘normal’ but also very good. It was nice to get to know you better in Bratislava. Rafa, I’m still planning to visit you sometime in Rennes. Qiquang and Ping, it was really nice to meet you. Yann and Sofia, it’s good to have you both still around the UvA. Other nice people who were once in the homkat group: Annemarie, Yasmin, Fred, Pawel, Zhou. A special thanks to the students I supervised: Melanie, who learned me to cross language barriers, Richard, we had some communication barriers, but I learned a lot from that. Thanks for your contribution to chapter 4 and our nice publication. Bas, unfortunately your work didn’t end up in my thesis, although the project was really cool. Good luck with your PhD in Leiden. Other students in our group: Lambert, Renee, Tessell, Stefan La Rooij, Marianne (de liefste student ooit!) and Klaas. The people from Molinc: Vlien, thanks for supervising my MSc project, I’ve had a great time and learned so much! Ruben, I was so happy to spent so much time in the lab with you during that time. You are a great friend and I’ve missed you ever since you decided to live abroad. From the moment we were fellow-‘penningmeesters’ for the RTTR, I’ve looked up to you. I hope you find a nice job in Zürich. Soraya, you have such a radiating energy! I really enjoyed working together with you as Sandra’s paranymphs. We’ve made the best music round ever. Also thanks for your work as matchmaker (blind dates and jobsearch). Also thanks to Ties, Peter H., Stefan W. and Dorette.

Besides all the work in the lab, there was also time for some relaxing moments the past years, such as the weekly fridaynight-(an sometimes also other days of the week)-drinks in the Oerknal. Avi, Stefan, René and Vincent, remember the time when we went for pubquiz every week? It was so good to end first place and win that disgusting champagne! I also had the honour to organise the labouting to Belgium together with SanderO and Bart. And not to forget the memorable summerschool with the Camerino-crew. Pimp-music, gin-tonics, nutella jars... stuck in my mind forever. The two skiing holidays with Colet, Rafa, Sandra, René, Esther V., Vinnie (and your cousin), Lukas, Guido and Riccardo. And of course the trip to Bonn Olé to see Scooter perform (it was worth it).

I also want to thank some other HIMS colleagues: Arthur, I still remember that first moment when we met at EJW during ’ezelen’. During our BSc, MSc and PhD, you’ve always supported me and tried to give my self esteem a boost when necessary. I’m looking forward to, at least(!), ten more years of such an amazing friendship. Ariana, thanks for setting up our writing club and for you help with LateX (I know this word should be in special fond). Dongdong (and also Mika and Kenan), thanks for the good times in Diemen. Dina, Robbert, Steven, Roel, thanks for the good conversations.

Ook oude studiegenoten en vrienden kunnen niet achterblijven in dit rijtje. Allereerst alle mensen van het hardloopgroepje bedankt: Esther V., dankjewel voor het draaiende houden van dit groepje en voor de vele lekkere etentjes en spelletjesmiddagen bij jullie thuis. Rutger en Dayinta, volgende keer doe ik echt mee met pandemie! Guido en Anna, er valt altijd wat te lachen met jullie. Freek, bedankt dat jij me overgehaald
hebt om dingen te doen die ik eigenlijk niet goed durfde, zoals m’n buitenlandstage en ook deels m’n promotie. En Jannie, Niels, Arthur en Vincent. En ook de meiden van het meidenententje bedankt: Carolien, Ester S. en Esther V. wat is het toch fijn dat we elke maand een avond hebben om alleen over vrouwendingen te babbeln. En ja, de volgorde van onze etentjes was echt vega, stamppot, vis, vergeten groenten en mexicaans.

Jeroen en Bart, ik kom jullie snel weer opzoeken in Tarragona! Peter S., jammer dat er nu geen gezamenlijke NCCC avonden meer komen. Coeroentjoe, altijd zo vrolijk en vol wilde ideeën. Lianne, Suus, Jan Hein en Kris, en Chuchu.

Tomislav, Tommy, I’m so happy that you came into my life in the last year of my PhD! I was really nice to look forward to the relaxing moments in the weekends with you during the busy worktime (for both of us). Thank you for motivating me and pushing me to work just a little bit harder. I enjoyed or working-dates, although I liked our other dates a lot more.

Tenslotte wil ik mijn familie en vrienden van de familie bedanken. Jullie hebben vaak aan me gevraagd waar ik aan werkte en waar ik nou eigenlijk mee bezig was. Sorry dat ik altijd probeerde onder deze vragen uit te komen. Ik hoop dat ik het goed kan maken met m’n lekenpraatje tijdens de ceremonie. Monique, Chantal, Nicole en Dave, bedankt voor de leuke vakanties samen (al is het misschien gepaster om de vakantie naar Toscane niet ‘leuk’ maar ‘avontuurlijk’ te noemen). Gina, Monique en Ignace, Sabina, Astrid en Arne, en Guus en Ineke, bedankt voor de gezellige tijden met als klapper op de vuurpijl het jaarlijkse kerstdiner. Ook Fam. Besselink (Loeki, Bob, Charlotte en Tim) bedankt! En natuurlijk bedankt aan m’n omaatjes. Oma Tineke, de liefste oma in de wereld! Oma Annie, wat heeft u veel kennis. En wat fijn dat ik daar al zo lang van dichtbij mag genieten.Sophia, we zijn zo verschillend maar toch vind ik het heerlijk om tijd met je door te brengen. Ik bewonder dat je altijd je hart op je tong draagt. Dankjewel voor alle autoritjes naar Zandvoort, love you!

En als laatste, Pap en Mam, wat hou ik veel van jullie! Door de praktische adviezen van Pa en de volg-je-hart adviezen van Ma beide te volgen, ben ik uiteindelijk Scheikunde gaan studeren. Dankjewel Mam, dat je me toederland gedwongen hebt om die studiekeuzetest te doen; het heeft heel goed uitgepakt. En ook al woon ik al ongeveer acht jaar in Amsterdam, toch voelt het bij jullie nog steeds als thuiskomen. Een thuis waar ik vaak een dagje zorgeloos kom genieten. Bedankt voor al jullie steun en liefde.

Linda
