Acknowledgements

Despite the fact that the cover of this thesis bares only my name, this work is the result of the joint effort of many people. I would therefore like to thank all those who have contributed their time, patience, guidance and knowledge. There are a number of people that I would like to thank individually for their help and endless support during the past four years.

First of all a special thank you to Dr. Stel, my co-promotor and daily supervisor. Dear Vianda, the many hours we have spent discussing and writing papers were always fruitful and 'gezellig'. I especially appreciated our ad hoc meetings and your limitless enthusiasm. The many trips we took together were always enjoyable, especially our sunny excursion to Cyprus, working on the Greek dataset with Dr. Kyriakos Ioannou.

Prof. Dr. Jager, dear Kitty, as my promotor you always saw the bigger picture. Despite your many obligations, you always made time to thoroughly read the manuscripts and ensured that every sentence was correct and unambiguous. Thank you for all your time and allowing me the opportunity to learn from your vast experience.

Prof. Dr. Abu Hanna, dear Ameen, as my promotor from the start you always made me feel welcome and appreciated. Even though you repeatedly stated that Kitty and Vianda were in charge, I would like to thank you for your ever insightful and valuable input, whether in our PhD trajectory planning meetings or in our discussions regarding the paper we wrote together.

Dear committee members, Prof. Dr. Van der Heide, Prof. Dr. Kunst, Prof. Dr. Scholten, Prof. Dr. Wanner, Dr. Van Ittersum en Dr. Noordzij. Thank you for taking time from your busy schedules to read and assess my thesis. I look forward to our discussions on the 25th of November.

A large part of this thesis was written on behalf of the European CKD Burden Consortium. I would like to thank everyone within the Consortium for their willingness to share their data and their valued collaboration in writing the manuscripts. It was very rewarding and educational for me to work and correspond with so many esteemed researchers. I have truly enjoyed our collaboration. My special thanks to the Steering Committee: Prof. Carmine Zoccali, Prof. Stein Hallan, Prof. Wim Van Biesen, Prof. Giovanni Gambaro, Dr. Charles Tomson.

A special mention is due to the following co-authors who each inspired me in their own way and who were willing to share their expertise with me so givingly: Prof. Dr. Hermann

Brenner, Prof. Dr. Ron Gansevoort, Dr. Simon Fraser, Dr. Fergus Caskey, Dr. Kyriakos Ioannou and Dr. Evangelia Dounousi.

For the funding I would like to thank SysKID and QUEST for making the presented research possible. In addition, I would like to thank our SysKID partners for their feedback and company during our annual meetings.

Spending four years in close quarters with colleagues who are facing similar challenges and experience, begets a sense of unparalleled comradery. I have been blessed in the fact that I have shared an office with some of the most wonderful people I could have hoped for. To Ace, Maria, Lidwien and Rosario, I cannot thank you enough for making this journey that much more fun and enjoyable. I will always be grateful for having on site tech support, which made the imminent threat from Audrey a small price to pay.

Thank you also to my other colleagues from the ERA-EDTA and ESPN Registry, Gita, Anneke, Moniek, Marlies and Arno, Marjolein and Nick. Our numerous trips to the ERA-EDTA congresses and Epidemiology courses will always remain a fond memory.

A big thank you also goes out to all the other "KIK-ers". I loved working with all of you and always enjoyed our coffee corner encounters and KIK-uitjes.

Committing to a PhD trajectory can be a daunting undertaking. However, having a support network of close friends and family makes the challenge all the more surmountable. To Dr. Renske Smit, my dear friend since High School and my maid of honour, thank you! Although we may not speak regularly, each time we meet it is as if we have never been apart. I just could not let you be the only one with a PhD!

To Caroline Theunissen and Pauline van Hirtum, two of my dearest and oldest fiends. Thank you for always being on hand to offer advice or a listening ear. We have come a long way since our first year in medical school and although time and circumstance mean that we no longer see each other on a daily basis, I would like you to know that your friendship means a lot to me.

To Marieke, who over the last three years has come to be a close friend and confidant, thank you for you all the hours spent with coffee, cake and your ever present dose of humour!

Traditionally, the role of the Paranymp is to support the defender both intellectually, as well as physically, should the need arise. Although I strongly doubt that the latter will be required, I am confident that the two paranymps standing by my side will rise to the

challenge regardless.

Maria, you have been my closest ally over the last three years and have seen me through all the highs and lows in completing this research. Beside the words of advice and encouragement throughout, you have also been a gracious hostess, proven to be a fantastic chef and last but not least a doting babysitter for my little ones (sprogs). You have always been a sympathetic ear in which I could vent my frustration and have willingly shared your nephrology expertise. I will without a doubt never find a neater, tidier room-mate. Thank you for all of this and more!

Dear Duveke, I have known you since the age of 4, since our first year at the Willem van Boeijenschool, and am so pleased that you are still at my side. The memories and experience we share are too numerous to mention, and you have been a constant presence during the most important events in my life. From our first Vondelpark performance during Koninginnedag and our hours of choir practice to being bridesmaid at my wedding and now supporting me as paranymp. I am truly blessed to have a friend like you.

Thank you also to my extended family, my in laws in South Africa and to Mary and Jan-Willem, who are basically family after all these years. You all have contributed by being there during the sporadic trips to South Africa, the Eifel and of course our wedding in Stellenbosch.

Vielen Dank auch an meine liebe Familie. Leider kann ich für diesen deutschen Teil nicht die wunderbare Begabung meines Mannes gebrauchen also wird der nächste Teil etwas weniger poetisch sein. Ich bin stolz auf unsere wunderbar große Familie und freue mich immer auf unsere Familientreffen. Da unsere Familie so groß ist werde ich nicht alle beim Namen nennen, aber ein paar sollen nicht ungenannt bleiben. Lukas, Anja, Omi, Oma, Ricarda, Markus, Daniel und Tassia, Ich danke euch und dem Rest unserer Sippe für eure Liebe und Unterstützung all diese Jahre.

Ganz besonders möchte ich meinen lieben Eltern danken. Lieber Ekkehard, vielen vielen Dank für alles. Wegen Deiner Doktorarbeit sind wir nach Amsterdam gezogen und Dein unbändiger Enthusiasmus, Eifer und Deine Freude an der Arbeit sind mir immer ein großes Vorbild gewesen. Dein Vorbild hat mir das Selbstvertrauen gegeben, auch meinen Dokortitel zu erreichen, zwar nur in der Medizin, welche du noch immer als Pseudowissenschaft siehst.

Liebe Sabine, (Bini Omi), Du bist die wunderbarste Mutter, die sich eine Tochter wünschen kann. Du hast mich immer in all meinen Unternehmen und Träumen unterstützt, das Wochenende auf Texel als 12-jährige mal ausgenommen. Ohne Deinen dauerhaften Einsatz als super Bini Omi hätte ich diese Promotion nie in der gestellten Zeit vollenden können. Ich kann Dir nicht genug für dies alles danken!

Meine liebe Anna-Lisa und mein lieber Oliver, auch wenn eure Ankunft die Doktorarbeit kurz unterbrochen hat, möchte ich euch von Herzen danken. Ihr seid zwei herrliche Frohnaturen, Danke dafür das ihr jeden Tag aufhellt mit euren sonnigen Gemütern.

Dearest Charlie, my wonderful husband, you have filled my life with joy for the last seven years. Thank you for your endless support and your unwavering commitment to our little family and me. I know the last months have been a bit stressful, with your new job and me finalizing my thesis, yet despite this and our sleep deprived nights we are still laughing! Of course I also thank you for your help in writing these acknowledgements, and most importantly I want to thank you for being you.
