I knew it would be a great adventure when I decided to come to Amsterdam in 2010, especially for a boy grew up in a little village never been seeing the world outside of China before. A lot happened during these past years, and as I imagined, it was an adventure indeed. And I’m so happy that finally I’m done with my PhD study since 2010.

A lot of people appeared in my life in The Netherlands, hereby I would like to thank you all for helping and being with me.

First of all, my promoter Marian Joels, thanks a lot for supervising me of my whole PhD training. I still remember the first meeting with you, those questions you asked really made me stuck, started from there I learned from you how to interpret my results and how to organise the answers for the questions (of course, it’s never enough). Especially during last year when I was trying to finish my thesis, you always arrange the monthly meeting with me and I learned how important the planning is. I highly appreciate you for what you have done for me, thank you very much!

Harm Krugers, my co-promoter, it’s really a pleasure to work with you and I have to say you are more than a supervisor to me, maybe an Uncle (Uncle Harm?). What I learned from you not only how to carry on the research, but also the attitude to life. You are always very optimistic, which I really liked and enjoyed a lot (never mad at me, though I have made some terrible mistakes). I thank you for being my boss and I want to say that the trip with you to China was so cool. You’re always welcome to come to China (bring your boys together), and I am always happy to be your local guide!

上海的熊老师. 非常感谢在上海您对我的照顾, 指导我做实验, 教我学习各种实验技术, 推荐我来到荷兰学习, 谢谢您. 还有Yang Zhou, 周杨师兄, 没有您来荷兰阿姆斯特丹的交
And of course guys of Lucassen group, I thank you all for being with me and supporting me. Marijn, homeboy for life, it’s a lot of fun to work with you, smoke with you, drink with you and discuss the your crazy ideas with you. Kit, hello Kitty, thanks a lot for being my Paranimfen, you are such a nice girl. Sofia, Marit, Sylvie, Wendy, Judith we’re working for the same supervisor, we support each other in our daily lab life, it’s amazing to be in a team with you. Lianne, you’re a cool girl, nice to have you in the same office and drink with you. Eva, you’re a very warm lady to me, always help me with the Dutch letters, and of course the template of the thesis you shared with me, really saved me a lot of time. Pascal, homeboy, thank you very much for showing me the mouse surgery and I enjoyed the drinking time with you, let’s do it more often. Maralinde, you’re a nice colleague, though we didn’t talk that much, I like you a lot. Jan, Gideon, Rob and Chris, many thanks for your technical support for my research. The big boss of Lucassen group, Paul, thank you very much for being my committee member, and also the suggestions and comments for my MMM presentations, these tips really help me improved a lot. Carlos and Aniko, though we didn’t really work in a same project, but many thanks for your suggestion to my research. In the end, I would like to specially thank you all for the supporting and warm greetings last year when my mother was ill, really helped me to relax a lot. I can’t say something very special to each one of you, but I really thank all of you guys, and I enjoyed the life in the group.

To the rest of colleagues in office A4.02, Ricardo, Erik, Lars, Willemieke, Simmone, Iris, Cindy, Gerrald, Nina, Eddy, thank you all very much for the seminar drinking, chatting and so on. It’s nice to be in the same office with you guys.

Henk, I would like to thank you for helping me with the e-recording experiment,
I learned a lot from you, also Pascal (Wadman group), Taco, Hans, and Sicco I appreciate a lot you help me out when I met problems. Professor Pennartz and Professor Gadella, thank you very much for the interviews you gave to me, which made it possible that I can work in SILS. Sabine and Lianne (VU), it was a pleasure to work with you, many thanks to you. Helmut and Maria (NIN), I’m so happy that I worked with you, thank you very much for the support and help. Stephan, Fred, and Laurent, it’s nice to cooperate with you guys, thank you very much.
