Contributor's statement

The guideline "Diagnostics for (alleged) sexual abuse in children" [De richtlijn Diagnostiek bij (een vermoeden van) seksueel misbruik bij kinderen]

T.F. Vrolijk-Bosschaart coordinated the development of the guideline and wrote the first draft of the manuscript; W.A. Karst participated in the development of the guideline and critically reviewed the manuscript; A.H. Teeuw supervised the guideline development and critically reviewed the manuscript.

The diagnostic utility of the Child Sexual Behavior Inventory for sexual abuse: A systematic review

T.F. Vrolijk-Bosschaart conceptualized and designed the study, collected data, carried out data analyses and drafted the initial manuscript; E. Verlinden assisted in the data analysis and critically reviewed the manuscript; M.W. Langendam, designed the study, supervised the data analysis and critically reviewed the manuscript; V. de Smet collected data and assisted in the data analyses; A.H. Teeuw, S.N. Brilleslijper-Kater, M.A. Benninga and R.J.L. Lindauer critically reviewed the manuscript.

Clinical profiles of children assessed for alleged childhood sexual abuse at an outpatient pediatric department between 2012 and 2016

T.F. Vrolijk-Bosschaart and M. Nagtegaal conceptualized and designed the study, collected data, carried out data analyses and drafted the initial manuscript; S.E. Zoetelief assisted in the data collection; S.N. Brilleslijper-Kater, M.A. Benninga and R.J.L. Lindauer critically reviewed the manuscript; A.H. Teeuw supervised the study design and data analyses, and critically reviewed the manuscript.

Investigations of the association between child sexual abuse and functional somatic symptoms in children lack scientific rigor; a systematic review of definitions and methods

T.F. Vrolijk-Bosschaart conceptualized and designed the study design, assisted in the design and execution of the literature search, collected data, carried out data analyses and wrote the first draft of the manuscript; M. Nagtegaal and E.M.M. Hoytema van Konijnenburg assisted in the data collection and analysis, and critically revised the manuscript; M.W. Langendam supervised the conception and design and assisted in the methodological aspects of this review; J. Daams designed and executed the literature search and critically reviewed the manuscript; A.H. Teeuw, S.N. Brilleslijper-Kater, M.A. Benninga and R.J.L. Lindauer critically reviewed the manuscript; J.H. van der Lee supervised the study design and data analysis, and critically revised the manuscript.

Psychosocial symptoms in very young children assessed for sexual abuse: A qualitative analysis from the ASAC study

T.F. Vrolijk-Bosschaart, conceptualized and designed the study, collected data, carried out data analyses and drafted the initial manuscript; G.A.M. Widdershoven and Y. Voskes supervised the qualitative data analysis and critically reviewed the manuscript; M. de Leeuw and M.J. Roskam contributed to the data collection and critically reviewed the manuscript; S.N. Brilleslijper-Kater contributed to the data analysis and critically reviewed the manuscript; A.H. Teeuw, E. Verlinden, , E.M. van Duin, A.P. Verhoeff and M.A. Benninga critically reviewed the manuscript; R.J.L. Lindauer supervised the study design, data analyses and critically reviewed the manuscript.

A descriptive mixed-methods analysis of sexual behavior and knowledge in very young children assessed for sexual abuse: The ASAC study

T.F. Vrolijk-Bosschaart, conceptualized and designed the study, collected data, carried out data analyses and drafted the initial manuscript; G.A.M. Widdershoven and Y. Voskes supervised the qualitative data analysis and critically reviewed the manuscript; M. de Leeuw and M.J. Roskam contributed to the data collection and critically reviewed the manuscript; S.N. Brilleslijper-Kater contributed to the data analysis and critically reviewed the manuscript; A.H. Teeuw, E. Verlinden, , E.M. van Duin, A.P. Verhoeff and M.A. Benninga critically reviewed the manuscript; R.J.L. Lindauer supervised the study design, data analyses and critically reviewed the manuscript.

Physical symptoms in very young children assessed for sexual abuse: A mixed methods analysis from the ASAC study

T.F. Vrolijk-Bosschaart, conceptualized and designed the study, collected data, carried out data analyses and drafted the initial manuscript; S.N. Brilleslijper-Kater contributed to the data analysis and critically reviewed the manuscript; G.A.M. Widdershoven and Y. Voskes supervised the qualitative data analysis and critically reviewed the manuscript; A.H. Teeuw, E. Verlinden, , E.M. van Duin, A.P. Verhoeff and M.A. Benninga critically reviewed the manuscript; R.J.L. Lindauer supervised the study design, data analyses and critically reviewed the manuscript.

Clinical Practice: Recognizing child sexual abuse – what makes it so difficult?

T.F. Vrolijk-Bosschaart conceptualized and designed the study, collected data, carried out data analyses and drafted the initial manuscript; S.N. Brilleslijper-Kater, M.A. Benninga and R.J.L. Lindauer critically reviewed the manuscript; A.H. Teeuw supervised the study design, data analyses and critically reviewed the manuscript.
