Safety management in mechanical heart valve replacement and oral anticoagulant therapy

Cromheecke, M.E.

Citation for published version (APA):
# Contents

1 **Introduction**
   1.1 Risk and safety in health care
      1.1.1 Professional credibility and patient-doctor contract
      1.1.2 Ethical considerations
   1.2 Risk and safety in heart valve replacement
      1.2.1 Mechanical heart valves
      1.2.2 Thromboembolic and bleeding complications in patients with mechanical heart valves
   1.3 The complexity of anticoagulant therapy
      1.3.1 Anticoagulant therapy in patients with a mechanical heart valve
      1.3.2 Management of anticoagulant therapy
   1.4 How to make mechanical heart valves safer
   1.5 References

2 **Controlling the risks of mechanical heart valve failure using product life cycle-based safety management**
   2.1 Introduction
   2.2 Testing medical devices
   2.3 Treatment of heart valve disease and valve failure
   2.4 Valve failure in a system’s perspective
   2.5 Barrier analysis of the BScc failure
   2.6 The product life cycle-based safety management system
   2.7 Accident reports, analysis and risk perception
   2.8 Control strategies and risk communication
   2.9 System control and assessment
      2.9.1 System control
      2.9.2 Assessment of effectiveness
   2.10 Resources and multidisciplinary research: the need for a national device safety board
   2.11 Conclusions
   2.12 References

3 **Retrieval analysis of mechanical heart valves: Impact on design and clinical practice**
   3.1 Abstract
   3.2 Introduction
   3.3 Patients and methods
   3.4 Results
   3.5 Discussion
      3.5.1 Interpretation and impact of implant retrieval analysis
      3.5.2 Retrieval analysis and preimplant tests
      3.5.3 Incident reporting and analysis
      3.5.4 Guidelines, practice changes, and communication
   3.6 Conclusions and recommendations
   3.7 References
Contents

7.3.2 Measurement of INR 92
7.3.3 Study design 92
7.3.4 Accuracy of the portable monitor 93
7.4 Results 93
7.5 Discussion 96
7.6 References 97

8 A randomized cross-over comparison between oral anticoagulation self-management and management by the Thrombosis Service in the Netherlands 99
8.1 Abstract 100
8.2 Introduction 101
8.3 Material and methods 102
8.3.1 Study population 102
8.3.2 Patient education 102
8.3.3 Measurement of INR 103
8.3.4 Study design 103
8.3.5 Statistics 104
8.4 Results 104
8.5 Discussion 107
8.6 References 109

9 Quality of life in patients on self-management compared to management by the Thrombosis Service in the Netherlands 111
9.1 Abstract 112
9.2 Introduction 113
9.3 Patients and methods 113
9.3.1 Patients and inclusion criteria 113
9.3.2 The questionnaire 114
9.4 Results 114
9.5 Discussion 117
9.6 References 118
