List Of Figures xix

1 Software Architecture 1
  1.1 Introduction ........................................ 1
  1.2 Definitions of Software Architecture ............... 2
  1.3 Business Goals ................................... 8
  1.4 Architectural Objectives .......................... 8
  1.5 Architectural Patterns ............................ 11
  1.6 Relating Goals–Objectives–Patterns ................ 17
  1.7 Final Remarks ................................... 17

2 Overview of the SAR Method 19
  2.1 Introduction ....................................... 19
  2.2 Forward Software Architecting ..................... 20
  2.3 Reverse Software Architecting ..................... 21
  2.4 Architecture Improvement ........................ 24
  2.5 The SAR Method .................................. 25
3 Relation Partition Algebra

3.1 Introduction ................................................. 29
3.2 Sets ......................................................... 30
3.3 Binary Relations ............................................. 32
3.4 Part-Of relations ............................................ 37
3.5 Introducing multiplicity in RPA ................................. 39
3.6 RPA Formulas in Action ....................................... 46
3.7 Discussion .................................................... 48

4 Described Architecture

4.1 Introduction ................................................. 51
4.2 ArchiSpect: Software Concepts Model .......................... 54
4.3 ArchiSpect: Source Code Organisation ........................ 58
4.4 ArchiSpect: Build Process .................................... 62
4.5 InfoPack: Files ............................................... 65
4.6 InfoPack: Import .............................................. 68
4.7 InfoPack: Part-Of ............................................. 76
4.8 InfoPack: Depend ............................................. 78
4.9 ArchiSpect: Component Dependency ........................... 80
4.10 ArchiSpect: Using and Used Interfaces ....................... 88
4.11 Concluding Remarks ......................................... 95

5 Redefined Architecture

5.1 Introduction ................................................. 99
5.2 ArchiSpect: Component Coupling ............................. 102
5.3 ArchiSpect: Cohesion and Coupling .......................... 109
5.4 InfoPack: Aspect Assignment .................................. 116
5.5 ArchiSpect: Aspect Coupling .................................. 118
5.6 Concluding Remarks .......................................... 122

6 Managed Architecture ........................................ 125
C.1 Teddy-Classic ........................................ 165
C.2 Teddy-Visio ........................................ 167
C.3 Teddy-PS ........................................... 168
C.4 Teddy-ArchView ..................................... 168
C.5 TabView ............................................. 168

D RPA Operators in a Nutshell .......................... 173

Bibliography ............................................. 179

Glossary ................................................ 189

Summary ............................................... 193

Samenvatting .......................................... 197

Curriculum Vitae ..................................... 201
