

## Supplementary Material S2

### COREQ 32-item Checklist

Title of the study: Implementing adjunct Trauma-Focused Imagery Rescripting in Underweight Eating Disorder Patients with PTSD: Therapist Challenges and the Supporting Role of Peer Group Supervision

Domain	Item	Guide questions/description	Response based on your manuscript
1. Research team and reflexivity	1	Interviewer/facilitator	First author (a clinical psychologist and group therapist) conducted all interviews and led the PGSS
	2	Credentials	MSc, Clinical Psychologist, Psychotherapist
	3	Occupation	Clinical psychologist and researcher
	4	Gender	Female
	5	Experience and training	15+ years of experience with ED treatment and ImRs; formal training provided by senior ImRs expert (4th author)
	6	Relationship established	The researcher had an established working relationship with the participants in a non-hierarchical setting
	7	Participant knowledge of the interviewer	Therapists knew the researcher was also a colleague and researcher
	8	Interviewer characteristics	The interviewer was aware of her dual role and collaborated with a researcher with experiential knowledge to reduce bias
2. Study design	9	Methodological orientation	Thematic analysis following Braun & Clarke (2006)
	10	Sampling	Purposeful sampling (all 5 therapists who participated in ImRs study)
	11	Method of approach	Face-to-face recruitment within the treatment center
	12	Sample size	5 therapists; 11 interviews; 32 PGS sessions recorded
	13	Non-participation	None (all invited therapists participated)
	14	Setting of data collection	In-person at the treatment center
	15	Presence of non-participants	No non-participants present during interviews or PGSS
	16	Description of sample	Age, gender, training, years of experience, therapeutic background (see Table 1)
	17	Interview guide	Yes, based on literature and expert feedback (see Table 2)
	18	Repeat interviews	Some therapists were interviewed multiple times depending on number of patients treated
	19	Audio/visual recording	Audio recordings were made and transcribed verbatim
	20	Field notes	Yes, during both interviews and PGSS
	21	Duration	Interviews: 25–55 mins; PGSS: 60 mins
	22	Data saturation	Claimed to be reached across 4 main themes
	23	Transcripts returned	Yes, for member validation
3. Analysis and findings	24	Number of data coders	Two independent coders, disagreements resolved through consensus
	25	Description of coding tree	Themes and subthemes structured; no formal tree diagram presented
	26	Derivation of themes	Themes were derived inductively from the data
	27	Software	Atlas.ti was used
	28	Participant checking	Yes, transcripts and summary sent to participants for feedback
	29	Quotations presented	Yes, representative quotes included
	30	Data and findings consistent	Yes, supported by structured themes and subthemes
	31	Clarity of major themes	Clearly defined and reported in Results
	32	Clarity of minor themes	Minor themes and exceptional cases discussed as relevant
