CONTENTS

Preface vii
Nomenclature and list of abbreviations ix

Chapter 1 General introduction
1.1 Background 1
1.2 Scope 2
1.3 Taxonomic resolution 4
1.4 Outline 6
References 8

Chapter 2 Presentation of the Sumapaz-transect
background, general description, and analysis of climate data
2.1 Introduction 13
2.2 Location and its selection 14
2.3 Geology 16
2.4 Soils 17
2.5 Climate
  2.5.1 Data 19
  2.5.2 Results 20
  2.5.3 Discussion and conclusions 25
References 30
Appendix 2.1 32
Appendix 2.2 33

Chapter 3 Vascular plant family diversity along the Sumapaz-transect
altitudinal patterns of richness and turnover
3.1 Introduction 35
3.2 Data 38
3.3 Methods 40
3.4 Results
  3.4.1 Vascular plant family richness 41
  3.4.2 Vascular plant family turnover 45
3.5 Discussion and conclusions
  3.5.1 Vascular plant taxon richness 49
  3.5.2 Vascular plant family turnover 52
References 55
Appendix 3.1 58

Chapter 4 Numerical classification of the vascular vegetation of the
Sumapaz-transect using the taxonomic rank of family
4.1 Introduction 61
4.2 Data 64
4.3 Methods 64
cont. Chapter 4

4.4 Results
  4.4.1 Input order dependence of TWINSPAN 65
  4.4.2 TWINSPAN-division of the relevé set, and
        vegetation types 65
  4.4.3 Differential families of the TWINSPAN-partitions 67
  4.4.4 Constrained block clustering, and vegetation table 69

4.5 Discussion and conclusions
  4.5.1 Input order dependence of TWINSPAN 74
  4.5.2 Numerical classification using the taxonomic
        rank of family 76

References 80

Chapter 5 The montane forests of the Sumapaz-transect
relationships between vascular plant family composition and
environment for three structural categories

5.1 Introduction 85
5.2 Data 88
5.3 Methods 91
5.4 Results
  5.4.1 Floristic similarity 92
  5.4.2 Correspondence analysis 93
  5.4.3 Procrustes analysis 104
5.5 Discussion and conclusions
  5.5.1 Input order dependence of DCA and CCA 106
  5.5.2 Vegetation-environment relationships 106

References 111

Chapter 6 Environmental and spatial variation in woody plant family
composition of northern Andean montane forests

6.1 Introduction 115
6.2 Data 117
6.3 Methods 121
6.4 Results
  6.4.1 Altitudinal interval from 525 to 3725 m 122
  6.4.2 Altitudinal interval from 2250 to 3000 m 130
6.5 Discussion and conclusions
  6.5.1 Input order dependence of DCA and CCA 134
  6.5.2 Sampling-imbalance sensitivity of DCA and CCA 134
  6.5.3 Environmental and spatial relationships 136

References 138
Appendix 6.1 141
Appendix 6.2 144

Chapter 7 Summary and conclusions 147

Samenvatting 153
Resumen 157
