# Table of Content:

Outline of the thesis

**Introduction:** 11

Chapter 1:
Understanding Ocular Immunology - What experimental and human studies have taught us 13

Section I: Analysis of Immunologic Determinants to Ocular Autoantigens in Experimental Models 55

Chapter 2:
Analysis of the pivotal residues of the immunodominant and highly uveitogenic determinant of interphotoreceptor retinoid-binding protein (IRBP) 57

Chapter 3:
Identification of heat shock proteins binding to an immunodominant uveitopathogenic peptide of IRBP. 67

Chapter 4:
Human S-antigen: presence of multiple immunogenic and immunopathogenic sites in the lewis rat. 77

Chapter 5:
Immunogenicity and pathogenicity of human s-ag determinants in rat strains 93

Section II: Immunologic Responses to Ocular Autoantigens in Humans 103

Chapter 6:
Cellular immune responses of uveitis patients to retinal antigens and their fragments. 105

Chapter 7:
A novel method for the determination of T-cell proliferative responses in patients with uveitis. 115

Chapter 8:
Prospective determination of t cell responses to s-antigen in behçet’s disease Patients and Controls 123

Chapter 9:
Human S-Ag determinant recognition in uveitis patients 135
Inhoud

Section III: Novel Therapeutic Strategies in Uveitis 147

Chapter 10:
FK506: treatment of experimental autoimmune uveoretinitis in primates. 149

Chapter 11:
Treatment of autoimmune uveoretinitis in the rat with rapamycin, an inhibitor of lymphocyte growth factor signal transduction. 155

Chapter 12:
Treatment of uveitis with recombinant human interleukin 13. 165

Section IV: Therapeutic Strategies for the Treatment of Human Uveitis 171

Chapter 13:
Clinical use of cyclosporine in ocular disease. 173

Chapter 14:
Combined use of cyclosporine and ketoconazole in the treatment of endogenous uveitis. 191

Chapter 15:
Long term follow up of patients with endogenous uveitis treated with combination cyclosporine and ketoconazole. 197

Chapter 16:
Intraocular inflammatory disease (uveitis) and the use of oral tolerance: a status report. 207

Conclusion 219

Summary and Conclusions 221

Samenvatting en conclusies 227
