ORGANIZING WASTE REDUCTION IN THE DUTCH WASTE SECTOR

TABLE OF CONTENTS

ACKNOWLEDGEMENT	13
1. Introduction	15
1.1 Solid waste and waste reduction	15
1.2 Solid waste in the Netherlands	16
1.2.1 A few figures	16
1.2.2 Policy objectives	19
1.3 The structure of the waste sector	20
1.3.1 The origin of organized waste handling in the Netherlands	20
1.3.2 Recent developments	21
1.3.3 The relation between the structure of the waste sector and waste reduction	24
1.4 Purpose and research questions	27
1.5 Structure of the thesis	29
2. Design of the research project	31
2.1 Introduction	31
2.2 Design of the research project	31
2.3 The six phases of the research project	33
2.3.1 Phase 1: Description of the organizational structure of the Dutch waste sector	33
2.3.2 Phase 2: Analysis of impediments for waste reduction in the structure of the Dutch waste sector	34
2.3.3 Phase 3: Single case studies	35
2.3.4 Phase 4: Comparison of case studies and generalizing conclusions	39
2.3.5 Phase 5: Recommendations for optimizing the structure of the Dutch waste sector	40
2.3.6 Phase 6: Exploration of the applicability of the recommendations	40
3. The structure of the Dutch waste sector and impediments for waste reduction	42
3.1 Introduction	42

3.2	Interorganizational networks	43
3.3	Objectives and method	45
3.4	The Dutch waste market and other participants in the waste sector	46
3.4.1	Participants in the waste market	47
3.4.2	Other participants in the waste sector	50
3.4.3	Relations between organizations	53
3.5	Impediments for waste reduction in the structure of the waste sector	55
3.5.1	Linked interests	55
3.5.2	Who is providing valid information?	58
3.5.3	Who is formulating policy?	58
3.6	Discussion	60
3.7	Conclusion	61
4.	Regulation of the waste market in New Jersey	63
4.1	Introduction	63
4.2	Waste law in New Jersey: responsibilities and tasks of governmental bodies	64
4.3	The waste market in New Jersey: participants and transactions	65
4.3.1	Waste management planning by governmental Bodies	65
4.3.2	Waste market	66
4.3.3	Physical flow of waste	67
4.3.4	Contracts	68
4.4	Flow control and prohibition of interstate shipment	68
4.5	Waste reduction	69
4.5.1	Policy goals on source reduction and recycling	69
4.5.2	Waste registration	70
4.5.3	Waste reduction incentives	71
4.6	Conclusions: structural elements and waste reduction in New Jersey	73
4.6.1	Separation/integration of functions	73
4.6.2	Conditions for transactions	73
4.6.3	Roles of governmental bodies	74
4.6.4	Scale	74
4.6.5	Responsibility for waste reduction	74
4.6.6	Conclusions	75

5.	Product responsibility in North Rhine-Westphalia	77
5.1	Introduction	77
5.2	Packaging ordinance	78
5.3	Duales System Deutschland (DSD)	80
5.3.1	Authorize the use of the green dot	80
5.3.2	Contracts for collection and sorting	82
5.3.3	Guarantors for plastic packages	83
5.3.4	The position of DSD in the packaging market	85
5.4	The waste market in North Rhine-Westphalia: participants and transactions	87
5.4.1	Collection	87
5.4.2	Processing	88
5.4.3	Disposal	89
5.4.4	The entrance of energy companies into the waste Market	90
5.4.5	DSD and the structure of the waste sector	91
5.5	Evaluation of the packaging ordinance and the dual system	92
5.5.1	Tension between source reduction and recycling	93
5.5.2	The free-rider problem	94
5.5.3	Shortage of processing capacity	94
5.5.4	Financial crises of DSD	96
5.5.5	Conflicts of interest of municipalities	97
5.5.6	The dominant position of energy companies and the monopolistic position	98
5.6	Conclusions: structural elements and waste reduction in North Rhine-Westphalia	99
5.6.1	Separation/integration of functions	99
5.6.2	Conditions for transactions	99
5.6.3	Roles of governmental bodies	100
5.6.4	Scale	100
5.6.5	Responsibility for waste reduction	100
5.6.6	Conclusions	101
6.	The structure of the waste sector in Denmark	102
6.1	Introduction	102
6.2	The waste market in Denmark: participants and transactions	102
6.2.1	Waste generators	102
6.2.2	Private collectors	103
6.2.3	Processors	105
6.2.4	Public disposers	106

6.3	Waste reduction	109
6.3.1	Source reduction and recycling	109
6.3.2	Registration system	110
6.3.3	Waste reduction incentives	112
6.4	Conclusions: structural elements and waste reduction in Denmark	115
6.4.1	Separation/integration of functions	115
6.4.2	Conditions for transactions	116
6.4.3	Roles of governmental bodies	116
6.4.4	Scale	117
6.4.5	Responsibility for waste reduction	117
6.4.6	Conclusions	118
7.	Waste reduction and the structure of waste sectors: a comparative study	119
7.1	Introduction	119
7.2	Five core elements	119
7.3	Case selection	122
7.4	Comparison of core elements	123
7.4.1	Separation/integration of functions	123
7.4.2	Conditions for transactions	125
7.4.3	The role of governments	128
7.4.4	Scale of planning	129
7.4.5	Responsibility for waste reduction	131
7.5	The combination of structural elements	134
7.6	Conclusions and discussion	138
8.	Reduction of waste and electricity demand in the Netherlands: a hypothetical intervention	140
8.1	Introduction	140
8.2	Method of analysis	141
8.3	The Dutch waste and electricity sector	142
8.3.1	The waste sector	142
8.3.2	The electricity sector	144
8.3.3	Vertical integration in the waste and electricity sector	147
8.4	A hypothetical intervention	148
8.5	Discussion and conclusions	153

9. Waste reduction and the structuring of waste sectors	156
9.1 Introduction	156
9.2 Method of analysis	157
9.3 The five proposals	158
9.3.1 Proposal 1: 'Vertical separation of market functions'	158
9.3.2 Proposal 2: 'Horizontal separation of the waste market'	159
9.3.3 Proposal 3: 'Withdrawal of public bodies from market functions'	159
9.3.4 Proposal 4: 'The responsibility for waste reduction needs to be attributed to market actors'	160
9.3.5 Proposal 5: 'Collectors should be encouraged to take an interest in achieving waste reduction'	161
9.4 Results of ex-ante evaluation	162
9.4.1 Proposal 1: 'Vertical separation'	163
9.4.2 Proposal 2: 'Horizontally separated market'	166
9.4.3 Proposal 3: 'Withdrawal of public authorities from market functions'	167
9.4.4 Proposal 4: 'Responsibility for waste reduction attributed to market actors'	169
9.4.5 Proposal 5: 'Establish an interest in waste collectors to achieve waste reduction'	171
9.5 Conclusions for the ex-ante evaluation	172
9.6 Reflections on the results of the research project	175
