Contents

chapter I  General Introduction ........................................................................................................ 7
Parts of this chapter are adopted from: JF Postma & D Groenendijk (1999)
Adaptation to metals in the midge Chironomus riparius: a case study in the
River Dommel. In: Genetics and Ecotoxicology, VE Forbes (ed), pp 79-101,
Taylor & Francis, London, UK.

chapter II  Seasonal dynamics and larval drift of Chironomus riparius
(Diptera) in a metal-contaminated lowland river ...................................................... 29
33, in press.

chapter III  Fluctuating asymmetry and mentum gaps in populations of the
midge Chironomus riparius (Diptera: Chironomidae) from a
metal-contaminated lowland river .................................................................. 51

chapter IV  Efficient shedding of accumulated metals during
metamorphosis in metal-adapted populations of the midge Chironomus riparius
.................................................................................................................. 69
D Groenendijk, MHS Kraak & W Admiraal (1999) Environ Toxicol Chem 18, in
press.

chapter V  Fluctuating life-history parameters indicating temporal
variability in metal adaptation in riverine chironomids .......... 89
Environ Con Tox, in press.

chapter VI  A method for crossbreeding strains of chironomid midges
(Diptera: Chironomidae) and its application to ecotoxicological studies ............ 107

chapter VII  Loss of metal adaptation in Chironomus riparius (Diptera:
Chironomidae) by simulating gene flow in adapted field
populations .......................................................................................... 117

chapter VIII  Concluding Remarks ...................................................................................... 137
Summary .............................................................................................................. 145
Samenvatting ...................................................................................................... 149
Nawoord ............................................................................................................ 155
Additional Publications .................................................................................. 159
Contents

Chapter I
General Introduction

Chapter II
Industry and Network-Connected Systems

Chapter III
Innovation, Design, and Networking Technologies

Chapter IV
A History of Innovation in Networking
