# Contents

<b>1 Introduction and Outline</b>	<b>1</b>
1.1 Bounded Rationality . . . . .	2
1.2 Theory of Nonlinear Dynamics . . . . .	4
1.2.1 Nonlinear economic dynamics: a historical perspective . . . . .	4
1.2.2 An example . . . . .	6
1.3 Outline of the Thesis . . . . .	11
<b>2 A Tâtonnement Process</b>	<b>15</b>
2.1 Introduction . . . . .	15
2.2 Price adjustment models . . . . .	16
2.3 The Model . . . . .	25
2.3.1 Price normalization . . . . .	25
2.3.2 Model specifications . . . . .	27
2.3.3 Some typical numerical simulations . . . . .	29
2.4 Symmetry . . . . .	31
2.5 Local bifurcation analysis . . . . .	35
2.5.1 Symmetry and the Jacobian matrix . . . . .	35
2.5.2 Rotational symmetry and the Hopf bifurcation . . . . .	38
2.5.3 Reflection symmetry and the period-doubling bifurcation . . . . .	39
2.5.4 $D_3$ symmetry and the Equivariant Branching Lemma . . . . .	40
2.6 Global dynamics . . . . .	43
2.6.1 Symmetry-breaking and $-$ -increasing bifurcations . . . . .	43
2.6.2 Rotational symmetry . . . . .	46
2.6.3 Reflection symmetry . . . . .	48
2.7 A price adjustment process close to one with $D_3$ symmetry . . . . .	51
2.8 Multiplicity of equilibria . . . . .	54
2.8.1 Transcritical and saddle-node bifurcations: a case study . . . . .	54
2.8.2 The continuous tâtonnement process . . . . .	56

2.9 Summary and conclusions . . . . .	57
<b>3 Perfect Foresight Cycles in OG Models</b>	<b>59</b>
3.1 The overlapping generations model . . . . .	59
3.2 Equivalence . . . . .	64
3.2.1 A cyclical exchange economy . . . . .	64
3.2.2 An overlapping generations model . . . . .	67
3.2.3 Equivalence of cycles and asymmetric equilibria . . . . .	68
3.2.4 A special case: the two generations overlapping generations model and Sarkovskii's theorem . . . . .	70
3.2.5 Extensions . . . . .	72
3.3 Examples . . . . .	76
3.3.1 A three generations overlapping generations model with CES utility functions . . . . .	76
3.3.2 A two generations overlapping generations model with CARA util- ity functions . . . . .	77
3.3.3 An example with two generations and capital . . . . .	80
<b>4 Learning in OG Models</b>	<b>83</b>
4.1 Perfect foresight versus learning . . . . .	83
4.2 The overlapping generations model . . . . .	86
4.3 Static expectations . . . . .	91
4.4 A regression on price levels . . . . .	95
4.5 A regression on inflation rates – part I . . . . .	100
4.6 A regression on inflation rates – part II . . . . .	107
4.7 Summary . . . . .	113
<b>5 An Evolutionary Model of Cournot Competition</b>	<b>115</b>
5.1 Introduction . . . . .	115
5.2 The Model . . . . .	118
5.2.1 Traditional Cournot Duopoly Analysis . . . . .	118
5.2.2 Quantity Dynamics . . . . .	120
5.2.3 Population Dynamics . . . . .	122
5.2.4 Local Instability Results . . . . .	128
5.3 A Typical Example: Best-Reply versus Rational Players . . . . .	132
5.4 Local Bifurcation Analysis . . . . .	133
5.4.1 Discrete Choice Dynamics . . . . .	134

## CONTENTS

5.4.2	Replicator Dynamics . . . . .	140
5.5	Global Bifurcation Analysis . . . . .	145
5.5.1	Homoclinic Bifurcation Theory . . . . .	145
5.6	Another Example: Imitators versus Best-Reply Players . . . . .	157
5.6.1	Discrete Choice Model . . . . .	158
5.6.2	Replicator Dynamics . . . . .	160
5.7	Concluding Remarks . . . . .	162
5.8	Appendix . . . . .	164
5.8.1	Derivation of Profit Functions . . . . .	164
5.8.2	Equivalence of the Cournot and Cobweb Model . . . . .	165
5.8.3	The Jacobian matrix . . . . .	166
5.8.4	Some Important Curves . . . . .	168
5.8.5	Diffeomorphisms . . . . .	169
<b>6</b>	<b>Price Adjustment in Monopolistic Competition</b>	<b>171</b>
6.1	Introduction . . . . .	171
6.2	A partial equilibrium model . . . . .	173
6.2.1	Best-reply dynamics . . . . .	175
6.2.2	Gradient systems . . . . .	180
6.3	A short memory learning procedure . . . . .	182
6.3.1	Examples: convergence . . . . .	184
6.3.2	Example: nonconvergence . . . . .	186
6.4	A long memory learning procedure . . . . .	192
6.5	Concluding remarks . . . . .	198
<b>7</b>	<b>A Model of Political Business Cycles</b>	<b>201</b>
7.1	Introduction . . . . .	201
7.2	Minimum wages for high-skilled labour . . . . .	203
7.2.1	The economic sphere . . . . .	204
7.2.2	The political sphere . . . . .	208
7.2.3	An extension to maximum wages for high-skilled labour . . . . .	216
7.3	Minimum wages for low-skilled labour . . . . .	218
7.3.1	The economic sphere . . . . .	218
7.3.2	The political sphere . . . . .	219
7.4	Discussion . . . . .	223
	<b>Bibliography</b>	<b>225</b>

Samenvatting (Summary in Dutch)

2.5 Global Bifurcation Analysis . . . . . 145

2.5.1 Homoclinic Bifurcation Theory . . . . . 145

2.5.2 Another Example: Limit Sets versus Hopf-Bifurcation Theory . . . . . 147

2.6 The Logistic Choice Model . . . . . 149

2.6.1 Bifurcation Dynamics . . . . . 149

2.6.2 Coupling Parameters . . . . . 150

2.6.3 Appendix . . . . . 151

2.7 Derivation of Profit Functions . . . . . 152

2.8 Evidence of the Cournot and Hotelling Models . . . . . 153

2.8.1 The Jacobian matrix . . . . . 153

2.8.2 Some Important Curves . . . . . 154

2.8.3 Discussion . . . . . 155

3 Price Adjustment in Monopolistic Competition . . . . . 157

3.1 Introduction . . . . . 157

3.2 A partial equilibrium model for monopolistic competition with price adjustment . . . . . 158

3.2.1 Best-reply dynamics . . . . . 158

3.2.2 Gradient systems . . . . . 159

3.3 A short memory learning procedure . . . . . 160

3.3.1 Example: convergence . . . . . 160

3.3.2 Example: nonconvergence . . . . . 161

3.4 A long memory learning procedure . . . . . 162

3.5 Concluding remarks . . . . . 163

4 A Model of Political Business Cycles . . . . . 164

4.1 Introduction . . . . . 164

4.2 Minimum wages for high-skilled labour . . . . . 165

4.2.1 The economic sphere . . . . . 165

4.2.2 The political sphere . . . . . 166

4.2.3 An extension to the labour market for high-skilled labour . . . . . 167

4.3 Minimum wages for low-skilled labour . . . . . 168

4.3.1 The economic sphere . . . . . 168

4.3.2 The political sphere . . . . . 169

4.4 Discussion . . . . . 170

5 Bibliography . . . . . 171
