ACKNOWLEDGEMENTS  

I thank my supervisors Prof. dr. Pim Jungerius and Dr. Rob van Zuidam and the heads of my division Prof. dr. Jan Nossin and Prof. dr. John van Genderen for their support. I appreciate the advice of Dr. Aart Kroon, and the remarks of Dr. ir. Jeroen Huising. They showed interest in my work and pointed me to new scientific aspects. Prof. dr. Huib de Vriend is thanked for useful comments and literature.

I supervised and collaborated with four trainees: Eva Berkhout, Marlous van der Meer, Sam Blok, and Sandra van der Linden. They provided me with the necessary feedback and I appreciate their contribution to this thesis.

Ian Cressie is thanked for the English corrections.

Within ITC I am especially grateful for the support of the staff of the (former) Image Processing Laboratory (IPL), ITC's librarians, and the administrative director and secretaries of the (former) Department of Earth Resources Surveys.

I thank several enthusiastic staff members and Ph.D. research fellows at ITC for creating a stimulating and creative atmosphere. The work of three of them, Dr. Christine Pohl, Dr. Wang Yiman and Cheng Tao had a direct impact on this thesis.

My colleagues of the Laboratory of Physical Geography and Soil Science of the University of Amsterdam, of the Institute for Marine and Atmospheric research in Utrecht (IMAU) and of the Survey Department of Rijkswaterstaat were very helpful and they always made me feel welcome at their institutes.

Daphne van der Wal is acknowledged for her moral support, many discussions and proofreading of the thesis.

I received remote sensing data from the Survey Department of Rijkswaterstaat and from ITC. Various persons at The National Institute for Coastal and Marine Management (RIKZ) of Rijkswaterstaat in Haren and in The Hague kindly provided the required additional data. I received advice from various people of the North Netherlands Directorate and from Tonny Overdiep, the local manager on Ameland.

I am indebted to Mr Ad Bakker and Mrs Els Bakker-Lammers for their hospitality, and to my friendly neighbours for the chit-chat in the evenings.

My special thanks go to my friends and family.
ACKNOWLEDGMENTS

I greatly appreciate the support of my family and friends during the research and writing of this dissertation. My wife, John, was a constant source of encouragement and support. My children, Emily and David, provided valuable insights and feedback throughout the process. My family's unwavering support and encouragement made this project possible.

I would like to thank the following individuals for their contributions to this work:

[Redacted]

Without their support and guidance, this work would not have been possible.

My thanks to [Redacted] for their valuable insights and feedback during the development of this manuscript. I also appreciate the assistance of [Redacted] in [Redacted].

I am grateful to the [Redacted] for their support and encouragement throughout the research and writing of this dissertation.

Finally, I would like to express my gratitude to my advisor, [Redacted], for their guidance and support throughout this project. Their enthusiastic support and unwavering belief in my abilities have been instrumental in making this work a reality.

I am also grateful to [Redacted] for their assistance and support during the writing process. Their guidance and feedback have been invaluable in shaping this manuscript.

I would like to thank [Redacted] for their invaluable assistance in [Redacted]. Their expertise and support have been integral to the success of this project.

Finally, I would like to express my gratitude to [Redacted] for their contribution to [Redacted]. Their support and encouragement have been essential to the completion of this dissertation.
