Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

CONTENTS

Chapter 1	General introduction	5
Chapter 2	The steady state internal redox state (NADH/NAD) reflects the external redox state and correlates to catabolic adaptation in <i>Escherichia coli</i>	33
Chapter 3	Growth of <i>Escherichia coli</i> at low oxygen concentrations, implications for catabolism and NADH/NAD ratio	53
Chapter 4	Anaerobic/aerobic transitions in chemostat cultures of <i>Escherichia coli</i> : effects on product formation, redox state, energy state and DNA supercoiling	65
Chapter 5	Cloning and sequencing of the lipoamide dehydrogenase of the pyruvate dehydrogenase complex of <i>Enterococcus faecalis</i>	83
Chapter 6	General Discussion and Conclusions	97
	Summary	103
	Samenvatting	107
	Samenvatting voor familie en vrienden	111
	Abbreviations	115
	Dankwoord	118

CONTENTS

Chapter 1	General introduction	1
Chapter 2	The steady state internal redox state (PART I)	15
Chapter 3	Effects of the external redox state and constraints on anaerobic metabolism in <i>Escherichia coli</i> (PART II)	35
Chapter 4	Effects of lactate on growth of low oxygen tolerance organisms: consequences, implications for metabolism, and the role of NADH/NAD ratio	55
Chapter 5	Anaerobic redox transitions in electron transport: the role of a redox-coupled effect on product formation: redox state, energy state and DNA signaling	75
Chapter 6	Transcription and regulation of the iron-sulfur cluster: development of the protease degradation complex of iron-sulfur proteins	95
Chapter 7	Iron: Essential and toxic	115
Chapter 8	Summary	135
Chapter 9	Index	155
Chapter 10	References	175
Chapter 11	Appendix: Redox potentials	195

This book is a compilation of the proceedings of the 1998 meeting of the Society for Environmental Microbiology, held in San Francisco, California, USA. The meeting was organized by the Society for Environmental Microbiology, which is a non-profit organization dedicated to the study of environmental microbiology. The book covers a wide range of topics related to environmental microbiology, including the role of microorganisms in the environment, the interaction of microorganisms with their environment, and the use of microorganisms in biotechnology. The book is a valuable resource for researchers and students in the field of environmental microbiology.
