Acknowledgments

The author wishes to express her gratitude to those who have contributed to the realization of this thesis, in particular:
Professor Guido Tytgat, my promoter, for giving me this wonderful opportunity to work in the Academic Medical Center and to study *Helicobacter pylori*, the subject which I dedicated my life to for eight years before I came to Amsterdam. I am greatly indebted to you for your support, encouragement and enthusiasm, which enabled me to complete this thesis. Your scientific approach will influence me forever.
Professor Jacob Dankert, my promoter, for your stimulating discussion, encouragement and support to the final version of most of the manuscripts.
Professor Xiao Shu-Dong and Professor Jiang Shao-Ji for giving me this opportunity to come to this beautiful country and for your past guidance in leading me to get a solid background in Gastroenterology and *H. pylori* – related research work.
Dr. Arie van der Ende, who was my direct supervisor. Thanks very much for the time and energy that you have invested in me, from arranging experiments or a scientific presentation to preparing a manuscript to be published and printing of this thesis. Your trust and encouragement and sincere cooperation lead me toward a “Molecular Microbiologist”. There wouldn’t have this thesis without your great help.
Dr. Carin Heringa, you arranged many things for me to come to this country and supplied patient’s data for this study.
Professor Fibo ten Kate and Dr. Shi Rao have examined hundreds of histologic specimens.
Dr. Liu Wen-Zhong and Dr. Xia De-Huang for your help in collecting biopsy specimens.
Dr. Jan Weel for your stimulating discussion and useful suggestions.
Dr. R.W.M. van der Hulst for your kind help and suggestions.
Mrs. Moniek Feller, thank you for your great technical assistance. Your very organized style impressed me very much. I also want to thank Mr. Philip Roorda for teaching me cell culture technique.
Mrs. Carla Hopman, I can’t forget your technical support as well as our kindly friendship.
Mrs. Marijke Beets for your kindly friendship and those wonderful photographs.
Mrs. Mienke Kooistra, who is so kind to arrange my research work and printing of my thesis.
Mr. Theo van Velthuizen who was my “financial manager” when I was in Amsterdam.
Mrs. Tytgat and Dr. Stefaan Tytgat, who generously supply me with a comfortable apartment.
All of my colleagues working in the Department of Medical Microbiology, who have been so kind to provide me with a nice working environment.
Certainly, I am greatly obliged to my parents for their understanding and encouragement, and also to my parent-in law for their support for taking care of my son for years.
Last, but not least, to my husband Su Wan-Wen for his understanding, substantial assistance and love. And also to my son, Su Yi-Ran, you still love me so much after we separated for more than two years. Thanks very much.
