Table of Contents

Chapter 1	Introduction	9
Chapter 2	Introduction of the Simplified Evaluation of Consciousness Disorders scale in the ICU: a prospective comparison of consciousness scales in patients with severe acute brain injury	23
Chapter 3	Indications, results and consequences of electroencephalography in neurocritical care: a retrospective study	49
Chapter 4	Auditory stimuli most effective in eliciting reactivity in critically ill patients with an impaired consciousness	63
Chapter 5	Serial measurements of neuron specific enolase, glial fibrillary acidic protein and neurofilament light for mortality prediction in patients with severe acute brain injury in the ICU	87
Chapter 6	Factors associated with very early withdrawal of life-sustaining therapy in ICU patients with severe acute brain injury	115
Chapter 7	Neurological outcome beyond the ICU in patients with severe acute brain injury: a knowledge gap for ICU teams	129
Chapter 8	Summary	143
Chapter 9	General Discussion	149
Chapter 10	Nederlandse Samenvatting	163
