Former Director of International
Agreements and Policy of the
German Ministry of Defence

Faculteit der Rechtsgeleerdheid

Acknowledgements

This book took shape over a period of four years, but my research and work in the area of nuclear security goes back even longer. I was fortunate enough to get involved in the Nuclear Security Summit process, starting in the run-up to the 2014 Summit in The Hague and continuing through the final Summit in 2016 in Washington, DC. It was a crash course in multilateral diplomacy, and it jump started my interest specifically in the topic of international law applicable to nuclear security. I am particularly grateful to the Ministry of Foreign Affairs of the Netherlands for giving me the opportunity to be part of such a unique experience.

The idea behind this research was nurtured by Professor Eric Myjer, whose encouragement convinced me to pursue this as a topic of PhD study. I owe him a debt of gratitude, not only for supervising my work but also for introducing me to the area of international arms control law, which set me on my current career path. My gratitude also goes to Professor Terry Gill. His guidance as my co-supervisor and his always pertinent, challenging questions noticeably enhanced the quality of the book.

The perseverance necessary to see this project through was only possible with the support of my wife, Petra. She put up with, if not always enthusiastically, the many late nights sitting at the computer and not infrequent outbursts of exasperation, knowing what achieving this goal meant to me. Also, my mother's weekly words of encouragement have been a crucial source of support. Thank you, as well, to the group of family and friends who stood behind me and kept me on the ball by regularly inquiring about my progress.

Lastly, I would be remiss if I did not express my thanks to colleagues I have had the privilege to work with over the years and the friends I have made travelling the world for this research. They have inspired me to push myself, to see things differently and have provided me with invaluable insights that fundamentally shaped my thinking for this book.
