General rights

It is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), other than for strictly personal, individual use, unless the work is under an open content license (like Creative Commons).

Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

1. General introduction, aim of the study	3
2. An introduction to photodetection techniques in gynecology	11
3. White light toxicity, resulting from systemically administered 5-ALA, under normal operating conditions	25
4. Photodetection with 5-aminolevulinic acid induced protoporphyrin IX in the rat abdominal cavity: drug dose dependent fluorescence kinetics	39
5. A mathematical evaluation of dose dependent PpIX fluorescence kinetics <i>in vivo</i>	53
6. Fluorescein angiography for the detection of metastases of ovarian tumor in the abdominal cavity, a feasibility pilot	69
7. Double Ratio fluorescence imaging for the detection of early superficial cancers; design, construction and performance of a clinical prototype	83
8. Localization and grading of cervical intraepithelial neoplasia using Double Ratio fluorescence imaging	97
9. Tumor staging with Double Ratio fluorescence imaging; a Monte Carlo study	109
Summary and conclusions	121
Samenvatting en conclusies	125
Dankwoord	129
Curriculum Vitae	130
