General rights

It is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), other than for strictly personal, individual use, unless the work is under an open content license (like Creative Commons).

Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, P.O. Box 19185, 1000 GD Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

1. General introduction, aim of the study	3
2. An introduction to photodetection techniques in gynecology	11
3. White light toxicity, resulting from systemically administered 5-ALA, under normal operating conditions	25
4. Photodetection with 5-aminolevulinic acid induced protoporphyrin IX in the rat abdominal cavity: drug dose dependent fluorescence kinetics	39
5. A mathematical evaluation of dose dependent PpIX fluorescence kinetics <i>in vivo</i>	53
6. Fluorescein angiography for the detection of metastases of ovarian tumor in the abdominal cavity, a feasibility pilot	69
7. Double Ratio fluorescence imaging for the detection of early superficial cancers; design, construction and performance of a clinical prototype	83
8. Localization and grading of cervical intraepithelial neoplasia using Double Ratio fluorescence imaging	97
9. Tumor staging with Double Ratio fluorescence imaging; a Monte Carlo study	109
Summary and conclusions	121
Samenvatting en conclusies	125
Dankwoord	129
Curriculum Vitae	130
