You will be contacted as soon as possible.

Gating neuronal activity in the brain

Cellular and network processing of propagating activity
in the perirhinal- entorhinal cortex

Janske G.P. Willems

Gating neuronal activity in the brain

Cellular and network processing of propagating activity
in the perirhinal – entorhinal cortex

Janske G.P. Willems

About the cover

The cover was designed by Janske Willems and shows the lateral view of the human brain, superimposed by a geometric brain schematically representing network connectivity. The perirhinal-enthorhinal network and its input from the amygdala and insula are highlighted in red.

Colophon

The research in this thesis was carried out at the Swammerdam institute for Life Sciences, a research institute of the Faculty of Science at the University of Amsterdam

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. ir. K.I.J. Maex

ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Agnietenkapel
op vrijdag 15 maart 2019, te 12:00 uur
door

Johanna Gerardina Petronella Willems
geboren te Wanroij

Promotiecommissie

Promotor

prof. dr. W.J. Wadman Universiteit van Amsterdam

Copromotor

dr. N.L.M. Cappaert Universiteit van Amsterdam

Overige leden

dr. C.S. Lansink Universiteit van Amsterdam

prof. dr. P.J. Lucassen Universiteit van Amsterdam

prof. dr. F.H. Lopes da Silva Universiteit van Amsterdam

prof. dr. C.M.A. Pennartz Universiteit van Amsterdam

dr. C.J. Wieringa Universiteit Utrecht

prof. dr. M.P. Witter Norwegian University of Science and Technology

Faculteit der Natuurwetenschappen, Wiskunde en Informatica

You can't fly unless you let yourself fall...

- Justin Bieber

Table of contents

Chapter 1. General introduction	9
Chapter 2. Distinct spatiotemporal activation patterns of the perirhinal-entorhinal network in response to cortical and amygdala input	25
Chapter 3. Parvalbumin interneuron mediated feedforward inhibition controls signal output in the deep layers of the perirhinal-entorhinal cortex	53
Chapter 4. Excitation-inhibition dynamics regulate activity transmission through the PER-LEC network via the cortical superficial layers	87
Chapter 5. Interaction of synaptic inputs alters the timing of inhibition, modulating the window of opportunity for information processing in the PER-LEC deep layer network	115
Chapter 6. General discussion	147
Chapter 7. English summary	165
Chapter 8. Nederlandse samenvatting	173
Chapter 9. Appendices	181
References	182
List of publications	206
Curriculum vitae	208
Dankwoord	210
