I am very grateful to my promoters professor Dr. Guido Tytgat, professor F.J.W. Ten Kate and professor Shu-Dong Xiao for their supervision of my research work and the thesis.

I would like to express my sincere thanks and respect to professor Dr. Guido Tytgat, Head of Department of Gastroenterology and Hepatology, Academic Medical Center, University of Amsterdam for his grandiose support to open the possibility for me to obtain my dissertation at the University of Amsterdam. I have especially appreciated and benefited from his keen intuition, his compendious advice and his rigorous scientific professionalism. My stay in Amsterdam has been very enjoyable and pleasurable mainly because of his excellent arrangements and his nice personality. I would like to say, "thank you very much" for so many things you provided. Professor Tytgat, I am very honoured that I can be your Ph.D student.

I would like to express my sincere thanks and respect to professor F.J.W. Ten Kate, Director of Department of Pathology, Academic Medical Center, University of Amsterdam. I have benefited from your profound knowledge on pathology. It has always been a pleasure time to discuss my work with you and it has always led to a better understanding of the problem.

I would like to express my sincere thanks and respect to professor Shu-Dong Xiao, Honorary Director of Shanghai Institute of Digestive Disease, Shanghai Second Medical University. I have benefited from his since very long ago since I joined his group in 1994. I owe him many things. I have learned from him the way to
do research, to dare with the hard life in the past years.

Special thanks are given to professor Xie-Ning Wu in the Department of Gastroenterology, Shanghai First Hospital for carefully correcting my manuscript. I have profited much from his rich theoretical knowledge and experience.

I have appreciated the support from all the teachers and colleagues in the Institute of Digestive Disease, Shanghai Second Medical University, Shanghai, China. I thank professor Yao Shi, professor Wen-Zhong Liu, professor De-Kai Qiu, professor Ji-Qiang Li and Mr. Yan-Shen Peng for their encouragement and kindly support. I am very happy that I have so many friendly and clever teachers and colleagues.

In particular, I would like to thank Ms. C.B. Heringa, Medical Director, International Department of Yamanouchi Europe B.V. for her generous support.

Finally I owe most thanks of all to my parents and my dear son Dong-Dong for their understanding, care and support of my study in the past years.
