List of Figures xi
List of Tables xii

1 Introduction 1
1.1 Motivation for the study 1
1.2 Layout and an overview 3

2 A characterisation of the labour market and the educational system 5
2.1 Economic orientation: from intervention to liberalisation 5
2.2 Labour market indicators and structural aspects 6
2.2.1 Population, employment and economic structure 6
2.2.2 Economic performance: growth and unemployment 10
2.2.3 Restrictive labour legislation but high wage flexibility 11
2.3 Industrial relations 13
2.3.1 Social partners and collective bargaining 13
2.3.2 The emergence of social concertation 19
2.3.3 On the level of centralisation in the collective bargaining scheme 20
2.4 The educational and training systems 23
2.5 Summary 26

3 A first look at the wage structure 27
3.1 Introduction 27
3.2 Data and sample summary statistics 27
3.3 On the estimated wage functions 28
3.4 Education 29
3.4.1 The rate of return to education 29
3.4.2 Wage differentials by levels of education: the fanning-out 30
3.4.3 Possible explanations for the fanning-out of wages 31
3.4.4 Changes in the industrial structure of employment and demand for education 33
3.5 Labour market experience and tenure with the employer 38
3.6 Industry effects 40
3.6.1 An overview of the literature 40
3.6.2 Centralisation and inter-industry wage dispersion 44
3.6.3 Evidence from Portugal and a comparison with other countries 44
3.7 Bargaining regimes 53
3.8 Firm size, firm age and ownership 53
3.9 Regions and gender 56
3.10 What have we learned? 57
Appendix 59

4 Returns to education: a comparison of alternative estimators 65
4.1 Introduction 65
4.2 Overview of the literature 65
4.3 Educational attainment and changes in compulsory schooling 68
4.4 Estimation methods 70
4.5 Estimation results 72
4.6 Towards and interpretation 74
4.7 Conclusions 75
Appendix 77

5 Job-worker matching and wages 79
5.1 Introduction 79
5.2 A simple method 81
5.3 The determination of actual education and required education 82
5.4 A glance at the job-worker matching 83
5.5 Job-matching and the returns to education: estimation results 85
5.6 Comparative static analysis and international comparisons 87
5.6.1 A simple LSD approach 87
5.6.2 The Tinbergen model (1956) 90
5.7 Decomposing changes in wage inequality 95
5.8 Conclusions 97

6 Returns to education: a quantile regression approach 99
6.1 Introduction 99
6.2 The estimation method 99
6.3 Theoretical background 101
6.4 Including years of education in the regressors list 104
6.5 Including a spline in years of education 107
6.6 Job-worker matching and the returns to education 111
7 Urban vs. rural return to human capital: a cook-book recipe for applying assignment models

7.1 Introduction
7.2 The model
7.3 Estimation methodology
7.4 Estimation results
7.5 Conclusions

8 Bargaining regimes and wages

8.1 Introduction
8.2 Collective bargaining wage-effect in some countries
  8.2.1 Estimated average wage mark-ups
  8.2.2 Differences in the rewards to individual and job characteristics
  8.2.3 Wage dispersion
8.3 Data and selected descriptive statistics by bargaining regime
8.4 The average wage-gap between bargaining regimes
8.5 Differences in the rewards to individual and job attributes
8.6 Decomposition of the wage differentials
8.7 Conclusions and remarks

9 Final conclusions and remarks

9.1 Wage determinants
9.2 What has really happened to wage inequality? How can it be explained?
9.3 Which model?
