**LIST OF TABLES**

Table 2.1: Type of Welfare State and Family Policy Regime ......................................................... 8
Table 2.2: The Breadwinner and the Individual Model of Social Policy ........................................... 15
Table 2.3: Actual policies relevant to work for recent mothers in Germany, the Netherlands, the United Kingdom and Sweden .......................................................... 20
Table 3.1: Observation period, Frequency & Sample Size: GSOEP, BHPS, OSA, HUS .............................. 29
Table 3.2: Number of women and children born during observation period ........................................ 33
Table 3.3: Labour force status in employment history calendar and spells ........................................... 35
Table 3.4: Earnings information in the household panel data sets ....................................................... 39
Table 3.5: Comparable educational level out of household panel data registration ............................... 41
Table 3.6: Years in paid work at time of having children in household panel data .................................. 43
Table 4.1: Labour Force Status of Women in Germany, Sweden and Great-Britain 12 and 3 Months Before Birth of First Child .......................................................... 47
Table 4.2: Labour Market Transitions of Women in Germany, Great-Britain, Sweden and the Netherlands based on Labour Market Status 3 Months Before and 24 Months After Birth According to Birth Order ........................................ 50
Table 4.3: Logit Regressions on the Determinants of Unbroken Labour Market Career (see 3,24) of Mothers in Germany, Great-Britain, The Netherlands and Sweden according to Birth Order (t-values in parentheses) .................................................. 53
Table 4.4: Cumulative Proportion of Recent Mothers Not Entering the Labour Market by Months Since Birth and Birth Order: Germany, Sweden, Great-Britain .................................................. 56
Table 4.5: Proportional Hazards of Months Before Entering the Labour Force After Childbirth According to Birth Order (t-values in parenthesis) ........................................ 57
Appendix Table 4.6: Means and standard deviations (in brackets) corresponding to Table 4.5 ............. 59
Table 5.1: Monthly earnings of women and their spouses one year (wave) before and two years (waves) after the birth of the first and the second child in former West-Germany and Sweden (DM:S 1993) .................................................. 65
Table 5.2: Wage regressions one survey before birth for recent mothers in Germany and Sweden 69
Table 5.3: Wage, labor force participation and hours regressions for recent mothers in Germany and Sweden the second year after birth .................................................. 70
Table 5.4: Mother’s contribution to family earnings 24 months after birth in Sweden and Germany predicted using own country regressions and other country regressions .................................................. 72
Table 6.1: Family Policies in Germany, Great Britain and Sweden .................................................. 79
Table 6.2: Women included in our samples by number of Births and Birth Order ............................... 84
Table 6.3: Age At First Birth, of women included in our samples ..................................................... 84
Table 6.4: OLS On Timing Of First Birth In West-Germany, Sweden and Great-Britain .......................... 87
Table 6.5: Number of Months Since First Birth Before Entering Employment .................................. 89
Table 6.6: Proportional Hazards of Months Before Entering the Labor Force After First Birth In Connection With A Subsequent Birth, all first time mothers................................................................. 91

Table 6.7: Proportional Hazards of Months Before Having a Second Child After the First Birth In Connection With Participating In The Labor Force After The First Birth, all first time mothers................................................................. 91

Table 7.1: Women’s wage regressions and probability of labour force participation before and after giving birth (t-values in parentheses) ........ 103

Table 7.2: Present value of Lifetime earnings loss as a fraction of potential life time earnings by education, of having the first child at different ages (23,27,31,35) ......................................................................................................................... 106

Table 7.3: Cumulative Proportion of Mothers According to Age at First Birth, Education and Time Period............................................. 109
