# Contents

1 Introduction and Outline
   1.1 Introduction ........................................... 1
   1.2 Approach and Background ............................... 3
   1.3 Outline and Main Results .............................. 4

2 Models of Intertemporal Trade under Information Asymmetry
   2.1 Introduction ........................................... 9
   2.2 The Informational Feedback from Prices: Rational Expectations .......... 10
   2.3 Multi-period Noisy Rational Expectations Models ......................... 27
      2.3.1 Two Period Models .................................. 31
      2.3.2 Multi-period Models .................................. 35
      2.3.3 Infinite-Period Models ............................... 43
   2.4 Concluding Remarks ..................................... 46
   2.A Relations Useful to the Noisy Rational Expectations Approach ........... 48

3 A Multi-Period Multi-Asset Noisy Rational Expectations Equilibrium .......... 51
   3.1 Introduction ........................................... 51
   3.2 The Model ............................................... 53
   3.3 Equilibrium ............................................ 55
   3.4 Special Cases ........................................... 61
   3.5 Concluding Remarks ..................................... 65
   3.A Appendix ................................................ 66

4 On the Impact of Information Friction in Re-Trade Economies ............... 71
   4.1 Introduction ........................................... 71
   4.2 The Model ............................................... 73
   4.3 Solution to the Pricing Problem ................................ 75
   4.4 Information Friction and Market Statistics ............................ 79
   4.5 Concluding Remarks ..................................... 87
5 Market Development under Costly Information
5.1 Introduction ............................................. 91
5.2 The Model .................................................. 92
5.3 Equilibrium ................................................. 94
5.4 Properties of the Equilibrium .................. 97
5.4.1 On the Impact of Longer Time Horizons .... 97
5.4.2 On the Impact of Information Asymmetry ... 99
5.5 Endogenous Information Acquisition ........ 102
5.6 Market Development under Costly Information .... 104
5.7 Conclusion ............................................... 111
5.A Appendix .................................................. 113

6 On Technical Analysis and Time Series Properties of Asset Returns 115
6.1 Introduction ............................................... 115
6.2 The Model .................................................. 119
6.3 The Multi-Horizon Equilibrium ............... 123
6.4 The Myopic Equilibrium ......................... 128
6.4.1 The Steady State ....................................... 128
6.4.2 Tying down the Equilibrium .................. 130
6.4.3 Chartists' Trading Rules ...................... 131
6.4.4 Market Statistics ..................................... 133
6.5 An Application ............................................ 134
6.5.1 Persistence of Liquidity Supply ............ 134
6.5.2 Correlated shocks to Liquidity ............... 140
6.6 Implications .............................................. 143
6.7 Concluding Remarks ................................. 146
6.A Appendix .................................................. 147

7 Market Failure in the Presence of Technical Analysts 151
7.1 Introduction ............................................... 151
7.2 The Model .................................................. 153
7.3 A Stationary Equilibrium ....................... 156
7.4 On the Impact of Technical Analysts ....... 161
7.4.1 Trading Rules ......................................... 162
8 Summary and Conclusion 181

9 Samenvatting (Summary in Dutch) 187
