## Contents

1 Introduction and Outline
   1.1 Introduction ........................................... 1
   1.2 Approach and Background .............................. 3
   1.3 Outline and Main Results .............................. 4

2 Models of Intertemporal Trade under Information Asymmetry .......................... 9
   2.1 Introduction ........................................... 9
   2.2 The Informational Feedback from Prices: Rational Expectations .......................... 10
   2.3 Multi-period Noisy Rational Expectations Models ................................................ 27
      2.3.1 Two Period Models .................................. 31
      2.3.2 Multi-period Models ................................ 35
      2.3.3 Infinite-Period Models .............................. 43
   2.4 Concluding Remarks ................................... 46
   2.A Relations Useful to the Noisy Rational Expectations Approach .......................... 48

3 A Multi-Period Multi-Asset Noisy Rational Expectations Equilibrium ................ 51
   3.1 Introduction ........................................... 51
   3.2 The Model .............................................. 53
   3.3 Equilibrium ............................................ 55
   3.4 Special Cases .......................................... 61
   3.5 Concluding Remarks .................................... 65
   3.A Appendix .............................................. 66

4 On the Impact of Information Friction in Re-Trade Economies ....................... 71
   4.1 Introduction ........................................... 71
   4.2 The Model .............................................. 73
   4.3 Solution to the Pricing Problem ........................ 75
   4.4 Information Friction and Market Statistics ..................... 79
   4.5 Concluding Remarks .................................... 87
8 Summary and Conclusion

9 Samenvatting (Summary in Dutch)
