The research described in this thesis was conducted at the department of Clinical Viro-Immunology (head dr. H. Schuitemaker) of the CLB and the Laboratory for Experimental and Clinical Immunology of the University of Amsterdam, Amsterdam, The Netherlands.

The studies were financially supported by the Dutch Ministry of Public Health and the Netherlands Foundation for Preventive Medicine, on advice of the Dutch Program Committee of AIDS Research in the context of the National AIDS Research Stimulation Program.

This work was performed as part of The Amsterdam Cohort Studies on HIV-1 infection and AIDS.

*(uit het Latijn)*
The research presented in this thesis was conducted at the Department of Clinical Pharmacology (headed by Dr. H. van der Linden) of the VU and the Laboratory for Experimental and Clinical Toxicology of the University of Amsterdam, Amsterdam. The author thanks...
