in het openbaar te verdedigen in de Aula der Universiteit

vrijdag 22 oktober 1999 te 12.00 uur

door

Hetty Blaak
egenomen te Groningen
The research described in this thesis was conducted at the department of Clinical Viro-Immunology (head dr. H. Schuitemaker) of the CLB and the Laboratory for Experimental and Clinical Immunology of the University of Amsterdam, Amsterdam, The Netherlands.

The studies were financially supported by the Dutch Ministry of Public Health and the Netherlands Foundation for Preventive Medicine, on advice of the Dutch Program Committee of AIDS Research in the context of the National AIDS Research Stimulation Program.

This work was performed as part of The Amsterdam Cohort Studies on HIV-1 infection and AIDS.

(uit het Latijn)
The research described in this thesis was conducted at the Department of Clinical Virology (headed by Dr. H. Sillevis Smitt) of the CB and the Laboratory of Virology and Clinical Virology of the University of Amsterdam, Amsterdam. The funding was from the Netherlands Organization for Health Research and Development (ZON). The studies were supported by the Dutch Ministry of Public Health and the Netherlands Committee for the Prevention of AIDS. The work was performed as part of The Amsterdam Cohort Studies on HIV Infection and AIDS.
