Host response against biomaterials: the role in the pathogenesis of biomaterial-associated infections
Boelens, J.J.

Citation for published version (APA):
LIST OF PUBLICATIONS

-J.J.Boelens, S.A.J. Zaat, J.Meeldijk, J.Dankert, Subcutaneous Abscess Formation around Catheters Induced by Viable and Non-Viable Staphylococcus epidermidis as Well as by Small Amounts of Bacterial Cell Wall Components, Accepted for publication in the Journal of Biomedical Materials Research

-J.J.Boelens, S.A.J. Zaat, J.L.A.N. Murk, J.J.Weening, T van der Poll, J.Dankert, Enhanced Susceptibility to Subcutaneous Abscess Formation and Persistent Infection around Catheters is Associated with a Protracted Interleukin-1β Production and Delayed Foreign Body Response in Mice, Submitted for publication

-J.J.Boelens, T van der Poll, S.A.J.Zaat, J.L.A.N.Murk, J.J.Weening, J.Dankert, Interleukin (IL)-1 Receptor Type I Gene-Deficient Mice are Less Susceptible to Catheter-Associated Staphylococcus epidermidis Infection, Submitted for publication

-J.J.Boelens, T. van der Poll, J.Dankert, S.A.J. Zaat, Interferon-γ Protects against Biomaterial-associated Infections, Accepted for publication in The Journal of Infectious Diseases

-J.J.Boelens, Host response against biomaterials. The role in the pathogenesis of biomaterial-associated infection (mini review), Manuscript in preparation

-J.J.Boelens, J.L.A.N.Murk, M.A. van den Bergh Weerman, K.P. Dingemans, J.D. Laman, Detection of peptidoglycan by immune electron microscopy, a novel tool to study Staphylococcus epidermidis evasion mechanisms for intracellular survival, Submitted for publication

L.H.Koole, Y.B.J.Aldenhoff, J.J.Boelens, Magnetic Resonance Micro-imaging in Biomaterials Science, Submitted for publication
