[67] Penelope F. Grammer (DMSO). Decision by the Defense Modeling and Simulation Office (DMSO) to commercialize the RTI and stop free distribution on September 30, 2002. Prior to September 30, 2002, the implementation of the RTI developed by the Defense Modeling and Simulation Office (DMSO) was freely available for download from the HLA Software Distribution Center. Since
that date, DMSO decided to stop free distribution of HLA "with the realization that there is an emerging commercial base of RTI development and support that will be better able to meet the future needs of the DoD M&S user community than a single product developed within the DoD" (e-mail communication via the HLA mailing list, August 2, 2002). The last freely available and supported RTI released by DMSO was version 6 of the RTI 1.3 Next Generation (RTI 1.3 NG V6). Various versions are available from commercial vendors (MÄK Technologies, www.mak.com; Mitsubishi Space Software Company, LTD., Japan, nyumi@kbo.mss.co.jp; Pitch AB of Sweden and Aegis Technology Group, dscheiding@aegistg.com; Science Application International Corporation (SAIC) and Virtual Technology Corporation (VTC), sturner@virtc.com).
