bezigheid. Tequila, voor jou hoefde het niet zo nodig, promoveren, maar toch ben je me al die jaren tot steun geweest. En door je minutieuze doorvloeien van mijn manuscript, heb je me in elk geval behoed voor een paar tante-boljes en verder een aanzienlijk aantal tiepvouten. Ik hoop dat er van nu af aan wat meer tijd overblijft om aan jou te besteden.

Acknowledgements

This thesis is partly based on the work of many colleagues abroad. First of all I would like to thank my colleagues of the EPSILON study group for their co-operation and support: Francesco Amaddeo, Andres Arriaga Arrizabalaga, Thomas Becker, Jennifer Beecham, Giulia Bisoffi, Elena Vázquez Bourgon, Liz Brooks, Sara Herrera Castaneda, Daniel Chisholm, Dorian Cristofalo, Rosa Dall'Agnola, Luis Gaite, Gwyn Griffiths, Julie Grove, Andrés Herran, Martin Knapp, Helle Charlotte Knudsen, Antonio Lasalvia, Paul McCrone, Anni Larsen, Morven Leese, Klaus Martiny, Sarah Padfield, Modesto Perez Retuerto, Mirella Ruggeri, Carsten Schou, Michele Tansella, Graham Thornicroft, José-Luis Vázquez-Barquero, Birgitte Welcher, and Ian White. I have fine remembrances of our meetings, which were always very stimulating. I especially liked the inspiring writing-up week in Gatton Manor. Days of hard labour, but also of rich meals, while outside people in chequered trousers linger on the golf course. I am proud to have been able to work with you and to write the IEQ papers with you.

I also would like to thank Manuel Gonçalves Pereiro, one of the firsts to translate the IEQ, in his case in Portuguese. Manuel, I would like to thank you for the work you have done on the IEQ, and for being not only a colleague but also a friend. I very much appreciated your concern and support when we were in Verona the day after I had heard that my partner was seriously ill. I hope we will meet again sometime.
