Regulation of cell growth in Multiple Myeloma: a role for the HGF/MET and WNT signaling pathways
Cover: Magnification of a HGF RNA in situ hybridization staining pattern, showing the follicular dendritic network within a Germinal Center of a human tonsil. The image has been enlarged and digitally enhanced.

This thesis was prepared at the Department of Pathology, Academic Medical Center, University of Amsterdam, Amsterdam, The Netherlands.

The research described in this thesis was financially supported by The Department of Pathology, Academic Medical Center (AMC), University of Amsterdam, The Dutch Cancer Society, and the Association for International Cancer Research (AICR). Printing of this thesis was financially supported by The Department of Pathology, AMC, University of Amsterdam, The University of Amsterdam, and Crisis Management Consultants (CMC).
