Acknowledgements

Several people and organizations have made it possible to bring this dissertation from its conception to fruition. First of all, I would like to thank all the study participants for their time and cooperation. I also greatly appreciate the work of all involved staff in Kisian, Asembo, Nairobi, and Atlanta without whom none of these projects would have been possible.

My heartfelt gratitude to the following people:

In England: Feiko ter Kuile, for being an astounding supervisor. Without his constant scientific support and 'open-door' policy, I would not have been able to carry out this dissertation. Penny Phillips-Howard for all her advice and encouragement.

In Atlanta: Monica Parise, for suggesting fieldwork in Kenya as an option for a masters thesis, and for later allowing me to work part time on this PhD; Rick Steketee, for helpful ideas on manuscripts and support in writing up this dissertation; Altaf Lal, for his continuous support of my career goals; William Hawley, for his encouragement to think in terms of the big picture; Lisa Mirel for keeping me sane over the last few months; Margarette Kolczak and Kathleen Wannemuehler for their patience and statistical support; Jyothi Thrivikraman, Sherline Lee, and Sadhana Patel for believing me when I said “I’ll be done next month” for the last one year!; Adam Wolkon, Sonja Mali, Todd Mercer, and Christi Murray for putting up with me as my office-mates for the last couple of years; all the rest of my colleagues in the malaria epidemiology branch for their friendship and providing me with a pleasant working environment.

In Kenya: Dr. John Vulule for giving me the opportunity to conduct research in Kenya; Larry Slutsker and Kevin De Cock for their advice and wisdom; Annemieke van Eijk for being a great friend, neighbor and dance partner; Dan Rosen for being such a good friend and entertainer; Kim Lindblade and Gerard Lopez for friendship, Ultimate Frisbee, and poker nights; all the rest of my colleagues at CDC/KEMRI for making my work and stay in Kisumu a memorable experience.

In Amsterdam: Professor Piet Kager for allowing me to pursue this PhD; Dianne Terlouw for being a great colleague and friend; Hannah Coutinho and Tjalling Leenstra for their friendship over the years.

In Geneva: Bernard Nahlen for giving me the opportunity to come and work in Kenya and his continued support towards my career.

At home: My parents, for their everlasting love and support; Toral, for being such an understanding and supportive sister; my brothers Sanjeev and Harshid, and the rest of my family for their love, patience and support; Nisha Patel, for her friendship and support since high school; Bimal Chudasama for spicing up my life in the final stages of my PhD writing.
