Molecular dynamics in thin glassy films

Cecchetto, E.

Citation for published version (APA):
Contents

1 Introduction 9
   1.1 Glass transition 10
   1.2 Relaxation dynamics 13
   1.3 Models of glass formation 15
      1.3.1 Cooperatively rearranging regions and dynamic heterogeneities 17
      1.3.2 Non-exponentiality 20
   1.4 Dynamics in confined geometries 21
      1.4.1 Effect of pure confinement on dynamics 22
      1.4.2 Effect of pure confinement on the glass transition 24
      1.4.3 Effect of interactions with a wall 25
   1.5 Aim of our work and outline 25

2 Hydrogen-bonded glass-formers in thin films 29
   2.1 Hydrogen-bonded glass-formers 29
   2.2 Glass-formers with mesogenic side-groups 30
   2.3 Our materials 31
      2.3.1 Bulk characterisation 33
   2.4 Thin films 35
      2.4.1 Spin coating 36
      2.4.2 Characterisation by Atomic Force Microscopy (AFM) 38

3 Glass Former in Confined Geometry by X-ray Reflectivity 41
   3.1 Introduction 42
   3.2 Experimental procedure 43
      3.2.1 X-ray reflectivity 43
      3.2.2 Sample preparation 48
   3.3 Results 49
   3.4 Discussion and conclusion 53
