Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, P.O. Box 19185, 1000 GD Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

Voorwoord-----	5
1. Introduction-----	7
Part I: Measuring and modeling the interactions between metals and dissolved organic matter in acidic soil solutions	
2. Comparison of diffusive gradients in thin films and equilibrium dialysis for the determination of Al, Fe(III) and Zn complexed with dissolved organic matter -----	19
3. Influence of pH and metal/carbon ratios on soluble organic complexation of Fe(II), Fe(III) and Al in soil solutions determined by diffusive gradients in thin films -----	37
4. Organic complexation of Al and Fe in acidic soil solutions: A comparison of DGT analyses with Model V and VI predictions -----	57
Part II: The implications of interactions of Al, Fe and organic matter for their mobility in acidic sandy soils	
5. Mobility of Fe(II), Fe(III) and Al in acidic forest soils mediated by dissolved organic matter: influence of solution pH and metal/organic carbon ratios -----	79
6. Mobilization of organic matter, Al and Fe in eluvial podzol horizons as affected by complexation and interactions with solid soil material -----	101
7. Mechanisms controlling the mobility of dissolved organic matter, Al and Fe in podzol B horizons -----	123
8. Synthesis-----	151
Summary -----	159
Samenvatting-----	167
References-----	175
Appendix -----	185
Curriculum Vitae -----	187
