About the author

The author of this thesis was born on November 19th, 1974 in Nijmegen, the Netherlands. At the age of one he and his family moved to Grave where he spent the majority of his childhood. He attended the Dukenburg/MaasWaal College in Nijmegen from 1986-1994. During that time he spent a year as an exchange student at Milford High School, Milford, USA (1991/1992). After graduating, he moved to Amsterdam to study Medical Biology at the University of Amsterdam. During this study he was trained at the Department of Clinical Genetics of the Academic Medical Center (AMC) (prof.dr. N.J. Leschot / dr. J.M.N. Hoovers) and at the Department of Clinical Viro-Immunology, CLB, Sanquin Blood Supply Foundation (prof.dr. F. Miedema / dr. D.R. Clark). Furthermore, he worked for several months as an undergraduate student on the project "The DAZ genes and impaired spermatogenesis" at the Center for Reproductive Medicine (prof.dr. F. van der Veen / dr. J.W.A. de Vries). In 1998 he graduated cum laude and started his training as a Clinical Embryologist at the Center for Reproductive Medicine in the AMC. During this time he also continued to work on the role of the human Y chromosome in male infertility. In the first half of 2001 he worked as a visiting scientist at the Whitehead Institute, Massachusetts Institute of Technology (MIT) (prof. D.C. Page / dr. S. Rozen). There the foundation was laid for the work presented in this thesis.

He currently works at the Center for Reproductive Medicine in the AMC as a clinical embryologist / researcher.

He lives together with Etelka Moll and their beautiful daughter Gijsje in Amsterdam, the Netherlands.
