SHORT PAPER

In this thesis.
ABSTRACTS

Deep-to-superficial layer communication in the rat entorhinal cortex. FENS Abstracts 1, A041.20.

entorhinal neurons receiving subicular input: physiology and morphology. Society for
Neuroscience Abstracts 27, program no. 953.16.

Physiology and morphology of single entorhinal neurons receiving subicular input.
Seventh Conference on the Neurobiology of Learning and Memory, Irvine.

organization and functional characterization of subicular output to the entorhinal cortex
of the rat. Society for Neuroscience Abstracts 26, program no. 262.11.

originates in the proximal apical or basal dendrites in urethane-anesthetized rats in vivo.
Society for Neuroscience Abstracts 26, program no. 69.5.

organisation and functional characterisation of subicular output to the entorhinal cortex
of the rat. European Journal of Neuroscience 12 suppl. 11.
