Dankwoord
First of all I would like to thank Gerben ter Riet, a friend and excellent teacher, who supervised this thesis and contributed to most of the chapters. I first met Gerben in March 2000 at the Centre for Reviews and Dissemination (CRD) in York (UK) and seduced him to visit the Horten Centre in Zurich on a 3-months senior secondment in 2001. The work of that time lay the groundwork for this thesis and for me was the starting point of a very exciting and ongoing collaborative working experience in the field of diagnostic research.

I am grateful to Johann Steurer, my boss at the Horten Centre for his commitment, generosity and financial support that allowed me to focus on the completion of this thesis. I also would like to thank him for his contributions to the Chapters 5, 6a and 6b.

Khalid S. Khan has played a great role in my personal development and in research. I could thank him for many things but let me stick to the essentials in particular. Khalid organised my fellowship at the University of Birmingham (UK) that allowed me to participate in his projects and in his research team. I enjoy his generosity and inspiration as a teacher. Khalid contributed to the Chapters 4, 7, 8, and 9.

I am also very grateful that Patrick M. M. Bossuyt agreed to act as the promoter of this thesis. It is indeed a great honour to me. Last but not least I would like to thank Jos Kleijnen for many valuable discussions during my stay at the CRD in York, his inspiring lectures in Hittisau and for many helpful advices.

Research usually is a collaborative effort. It definitely was for this thesis. I would therefore like to thank all the remaining co-authors for their excellent work: Corinna Kronenberg (Chapter 3), Esther Kolb (Chapter 5), Honest (Chapter 4), Janesh K. Gupta (Chapter 8), Joachim E. Fischer (Chapter 6a), Joseph Ogah (Chapter 7), Michael T. Koller (Chapters 5 and 6a), Phil Owen (Chapter 7), Pius Estermann (Chapters 2 and 3), T. Justin Clark (Chapter 8) and Reto Coray (Chapter 2).
