Contents

1 Introduction and Outline 1
1.1 Part I: Individual-based models of interest groups 4
1.2 Part II: Other-regarding preferences 9

I Individual-Based Models of Interest Groups 13

2 A Dynamic Model of Interest Group Sizes 15
2.1 Introduction 15
2.2 The model 18
2.3 Comparative statics 22
  2.3.1 Contribution level 25
  2.3.2 Size of sector 27
  2.3.3 Income level 29
  2.3.4 Behavioral sensitivity 31
2.4 Dynamics 33
2.5 Concluding remarks 39

3 Social Interaction in a Spatial Voting Model 43
3.1 Introduction 43
3.2 Adaptive political parties 45
3.3 Interest groups 51
3.4 Social interaction and clusters of political opinions 57
3.5 The full model 65

CONTENTS

6.4.2 Behavior in our moonlighting game vs. the Abbink et al. moonlighting game ........................................... 118
6.4.3 Tests of the self-regarding preferences model ................................................................. 121
6.4.4 Tests for trust, fear, altruism, and reciprocity .............................................................. 124
6.5 Concluding remarks .................................................. 129

7 Testing Inequality Aversion .................................................. 131
7.1 Introduction .............................................................. 131
7.2 Inequality aversion ....................................................... 132
  7.2.1 The Fehr and Schmidt model .................................................. 132
  7.2.2 The Bolton and Ockenfels model ........................................... 132
7.3 Experiment 1: A direct test of inequality aversion ..................................................... 134
  7.3.1 Procedures for experiment 1 .................................................. 135
  7.3.2 Results from experiment 1 ................................................... 136
7.4 Experiment 2: How dictators respond to changed opportunities .................................... 136
  7.4.1 Procedures for experiment 2 .................................................. 138
  7.4.2 Results from experiment 2 ................................................... 138
7.5 Other-regarding preferences .................................................. 139
  7.5.1 The Charness and Rabin “reciprocity-free” model ........................................... 139
  7.5.2 The two-agent model of egocentric other-regarding preferences ........................................... 142
  7.5.3 Dictator games .............................................................. 142
  7.5.4 Rationalizing the results from the dictator experiments ........................................... 145
7.6 Concluding remarks ...................................................... 147

8 A Model of Other-Regarding Preferences ........................................... 151
8.1 Introduction .............................................................. 151
8.2 The many-agent model of egocentric other-regarding preferences ........................................... 152
8.3 Games with proposer competition .............................................................. 153
8.4 Games with responder competition .............................................................. 156
8.5 Voluntary contributions public good games ..................................................... 160
8.6 Ultimatum game .............................................................. 165
CONTENTS

8.7 Concluding remarks ........................................... 170

9 Summary and Conclusions ....................................... 171
9.1 Part I: Individual-based models of interest groups .......... 171
9.2 Part II: Other-regarding preferences ......................... 175

A Microfoundation of Interest Group Model ....................... 179

B Proof of Proposition 4.2 ........................................ 181

C Experimental Instructions (translated from Dutch) .......... 187
C.1 Treatment A instructions ..................................... 187
C.2 Treatment B instructions ..................................... 192
C.3 Treatment C instructions ..................................... 194

D Experimental Instructions ....................................... 199
D.1 Instructions for experiment 1 ................................ 199
D.2 Instructions for experiment 2 ................................ 200

E Proof of Proposition 8.3 ......................................... 205

Bibliography ...................................................... 211

Samenvatting (Summary in Dutch) ................................. 223
